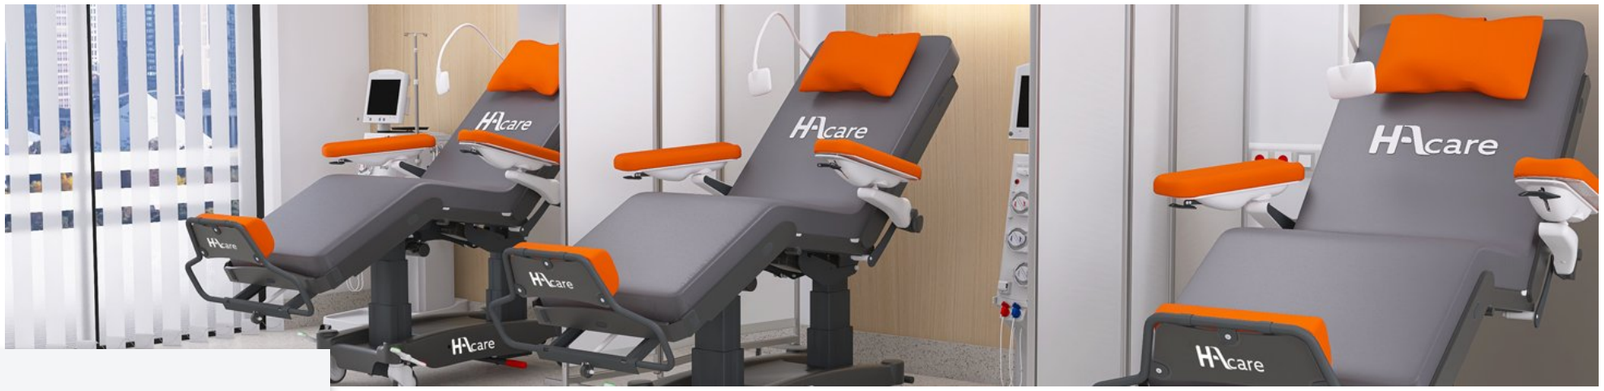
HAcare, specialist in medical devices since 1860.

At HAcare, we design, manufacture and distribute medical devices and innovative, durable medical furniture solutions designed to improve the daily lives of patients and healthcare professionals alike.



The HAcare Group's eco-responsible commitments

The HAcare group commits to an **eco-responsible industrial orientation**

In its sustainable development strategy, the HAcare group has defined a list of **6 commitments** that guide its **actions and decisions** since the group's creation and for the years to come.

Indicators have been set up for each commitment.

Our 6 commitments

- Made in France production
- The use of renewable resources
- Integrating the circular economy into all new product developments
- Responsible purchasing (supplier quality monitoring)
- Daily actions to respect and protect the environment
- Combating RSI and noise pollution through our products

Choose the circular economy

HAcare finished products can be recycled through a recovery circuit at the end customer's premises, for recycling with our partner supplier. As wood cannot be recycled ad infinitum because its fibers become too small or exhausted, wood waste is recovered and transformed into green energy.

The plant fiber boards used in the manufacture of HAcare products are 100% reclaimed wood. Each HAcare finished product bears an index revealing the proportion of plant fiber contained.

Recycling is the practice of recovering used materials from the waste stream, then incorporating these same materials into the manufacturing process. Each HAcare finished product carries an index revealing the proportion of recycled material it contains.

Recyclable materials

HAcare finished products are 95% recyclable. For example, the HAcare medical bed is entirely recyclable, except for the wheels and motors. Each bed can be dismantled to recover each material separately: plant fiber, metal, plastic.

PLANT FIBER

Recycled wood

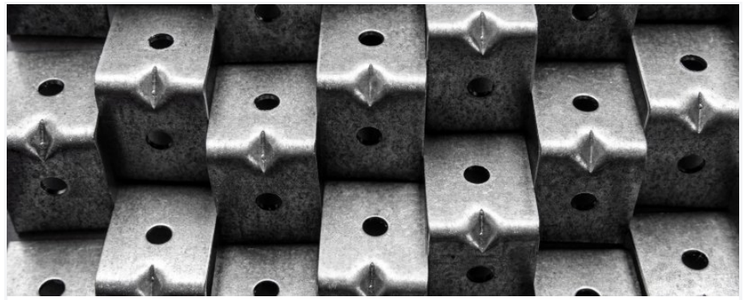
The plant fiber boards used in the manufacture of HAcare Group products are:

100% reused wood

Reuse is one of the environmentally friendly processes. It involves, for example, leftovers from wood-processing companies (e.g. sawmill scraps, production offcuts...). But also by-products from activities such as sustainable forest management and slope maintenance.

100% FSC-certified wood

Recyclable with a partner supplier who, on a worldwide exclusive basis and since 2021, recycles MDF and HDF panels.No water consumption, nor green energy **biomass**.



The metal

All metal components are **recyclable** and reusable, **infinitely**. Once the metal has been sorted, it is compressed, crushed, rolled and melted. It is then remolded into coils, bars or wire for reuse. This process can be endless!

Metal recycling has **many advantages**. It conserves natural resources by reducing the need for virgin materials, cuts energy consumption and reduces **greenhouse gas emissions**.

Recycled plastic

At recycling plants, waste (re) becomes a **raw material** through various processes: grinding, micronization, regeneration of plastics.

The recycled plastic will then be resold to **plasturgy** manufacturers in the form of **flakes**, powder or even **granules**.

HIGHLIGHTS

HIGHLIGHTS

Appropriate Materials (Design and finishes)

Designed for outdoor use, the I-MOVE OUTDOOR features **finishes built to last**.

Its epoxy-coated steel frame **provides effective protection against moisture**. The anodized aluminum handles remain sturdy and comfortable even with heavy use.

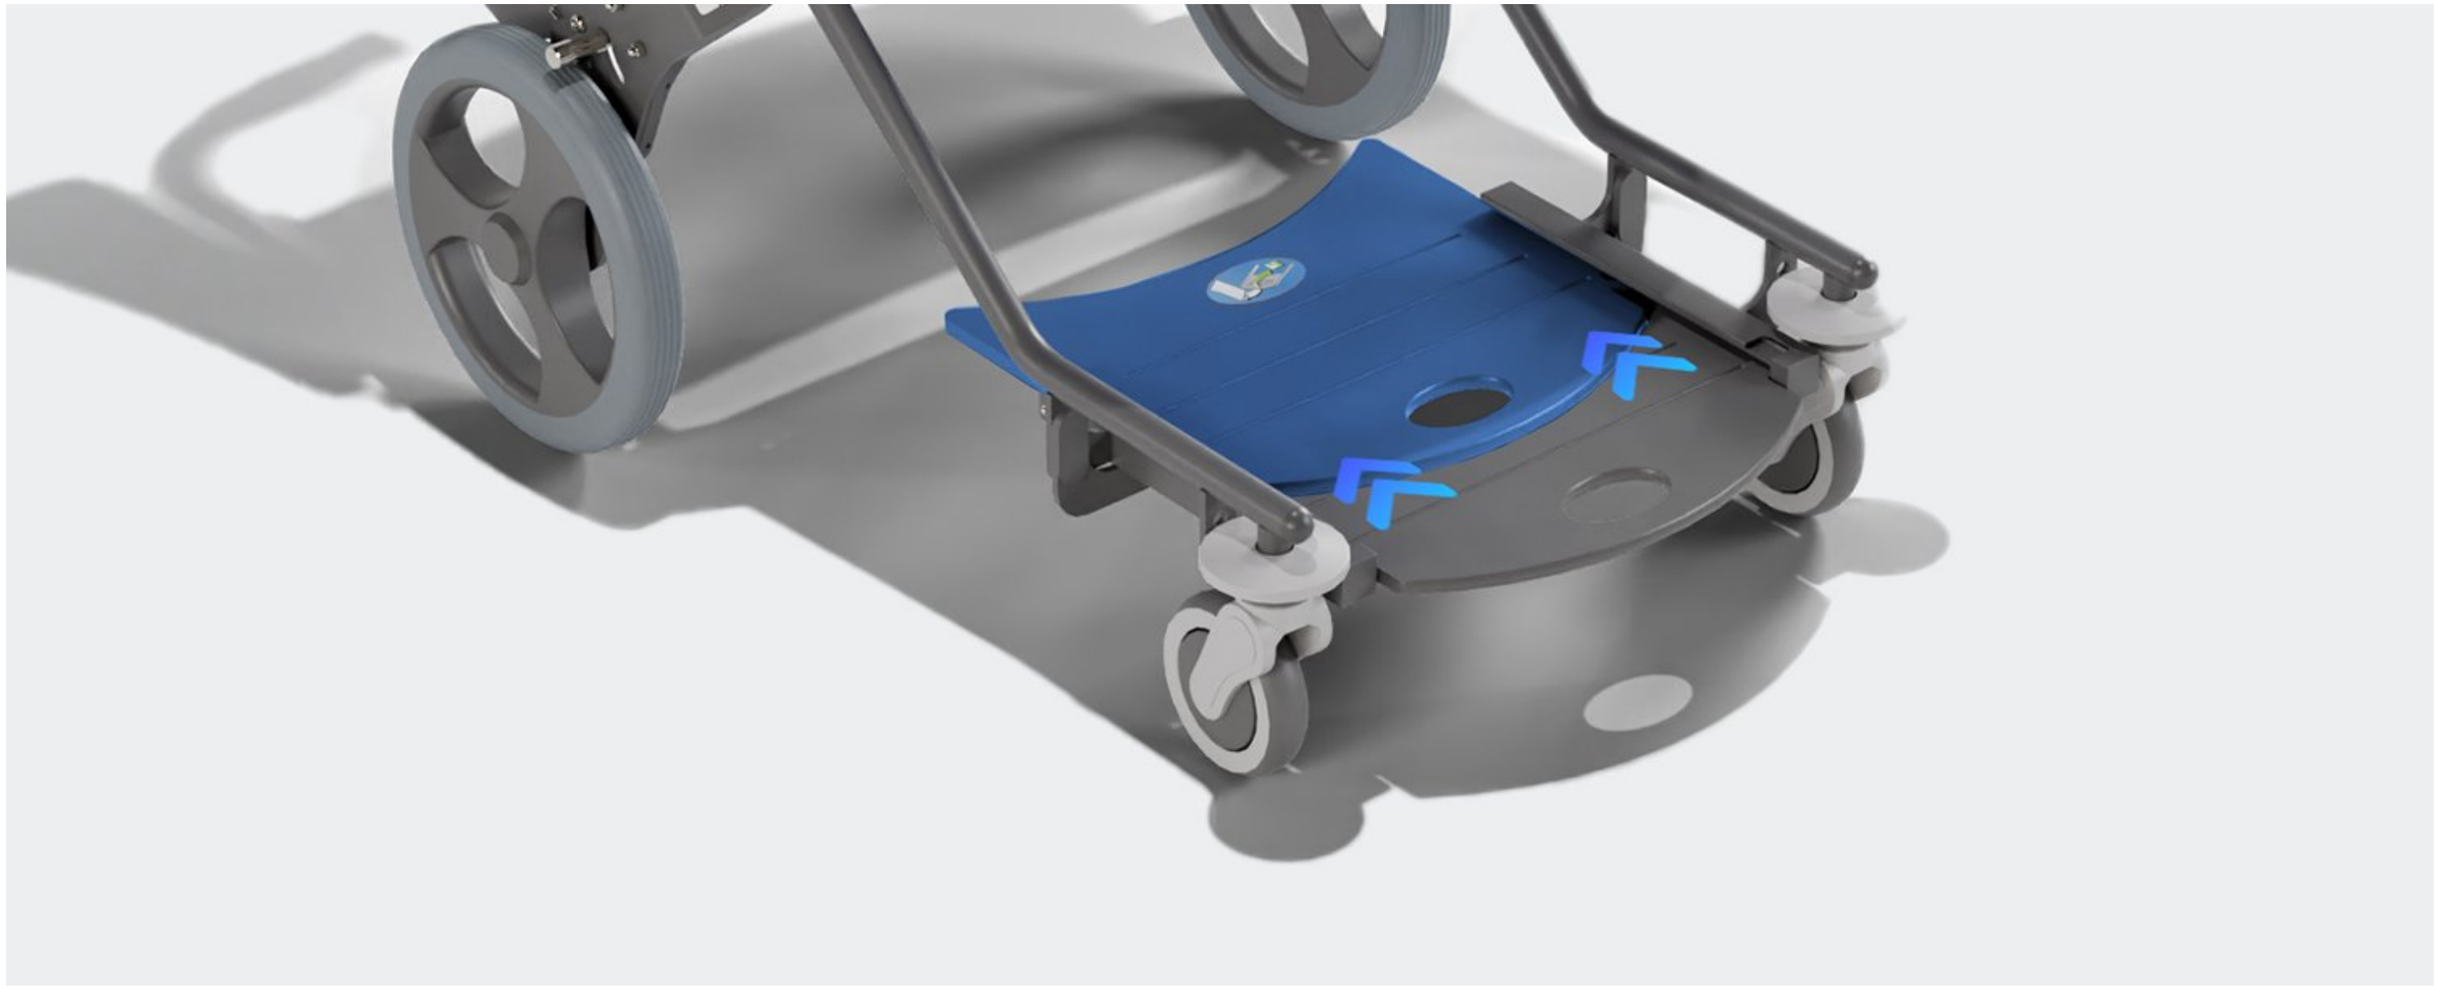
The polypropylene plastic components, which are **durable and easy to maintain**, make daily cleaning a breeze.

Comfort (Comfort)

Comfort

HIGHLIGHTS

Comfort and safety (Comfort and safety)



Comfort and safety

HIGHLIGHTS

Double reinforcement for exceptional durability (Robustness)

The transfer chair, designed with a **double frame**, combines **sturdiness** and **lightness** for **reliable** and **long-lasting** everyday use.

Its **reinforced structure** ensures **optimal strength**, while its **lightweight design** makes it easy for healthcare staff to **move** and **handle**.

This **unique combination** ensures both patient **safety** and **user comfort** for **caregivers**, making every **transfer smoother**, more ergonomic, and **safer** in the hospital setting.

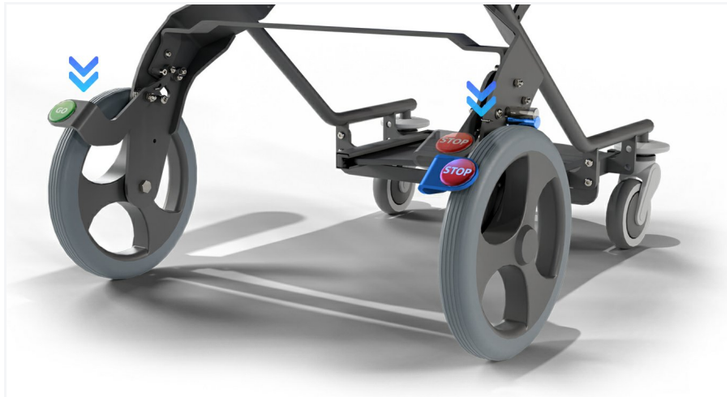
Optimized logistics (Optimized logistics)

Optimized logistics

CHARACTERISTICS

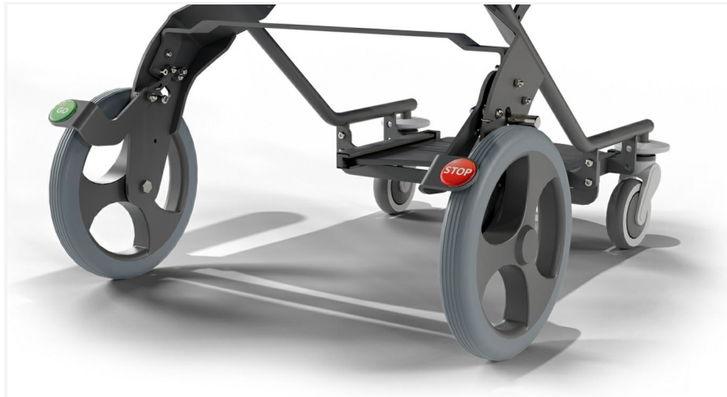
CHARACTERISTICS

Mobility



Mobility

Mobility



300-mm wheels for easy rolling

These **wheels** provide **excellent stability** and a **smooth ride**, reducing the physical strain on staff when moving patients on a stretcher.

Suitable for **a variety of floor surfaces**, they **make maneuvering easier** while **minimizing** the risk of **fatigue** and **musculoskeletal disorders** (MSDs).

Ergonomic handles

The **pushing** effort is **reduced** by the **ergonomic handles** that fit the hands perfectly.

A **better grip** makes it **easier to maneuver the stretcher** and helps **prevent** musculoskeletal disorders (**MSDs**).

CHARACTERISTICS

Configurable

Configurable

Configurable

Patient Record Holder

The transfer chair's **wide file holder** is designed to **simplify** the daily work of healthcare staff. It allows **patient files** to be slid into the back of the chair **without bending over**, reducing physical strain and the risk of fatigue.

This feature improves **ergonomics** and **safety** during transfers while **optimizing** staff **time** and efficiency.

It thus ensures **greater comfort** for caregivers while maintaining a **smooth** and organized patient **care process**.

Dedicated TPS Area

The transfer chair is designed to accommodate TPS units on **either side** of the chair, providing **immediate accessibility** and maximum **convenience**.

This smart design allows caregivers to keep **essential equipment** within **easy reach,** optimize their organization, and **streamline their movements** during **patient care**.

It helps **save time,** improve efficiency, and create a more ergonomic and **safe** work environment for both staff and patients.

A basket of services for better care

The transfer chair is equipped with a spacious, **easily accessible storage basket for personal belongings,** located under the seat.

It allows the patient to safely **store their belongings** throughout the transfer.

This **practical solution** helps improve organization, eliminates the need for extra handling, and enhances both **patient comfort** and the efficiency of the care staff during **patient care.**

CHARACTERISTICS

Configurable

A docking station for effective fleet management

The transfer chair docking station offers a **comprehensive fleet management solution**. Thanks to its foot-activated **check-out** system, it allows for quick and easy pickup and return. Equipped with an **anti-theft device,** it ensures the **safety of the chairs** while facilitating the organization and **tracking of equipment.** This station **optimizes** hospital logistics, reduces losses, and simplifies the daily work of healthcare staff, combining convenience, safety, and efficiency for **optimal** transfer chair **management**.

A leg rest for people with limited mobility

The leg rest built into transfer chairs has been specially designed for **people with limited mobility**, providing **stable** and **comfortable support** throughout the transfer.

It helps **keep the legs** in an ergonomic position, **reducing fatigue** and the risk of **discomfort**. This feature ensures a safer and smoother **transfer**, while making the caregiver's job easier. Patient comfort and convenience for caregivers are thus fully optimized during every procedure.

Color Options

Three colors (blue, orange, and green) are available to clearly distinguish between different uses or services. A simple solution to **improve organization**.

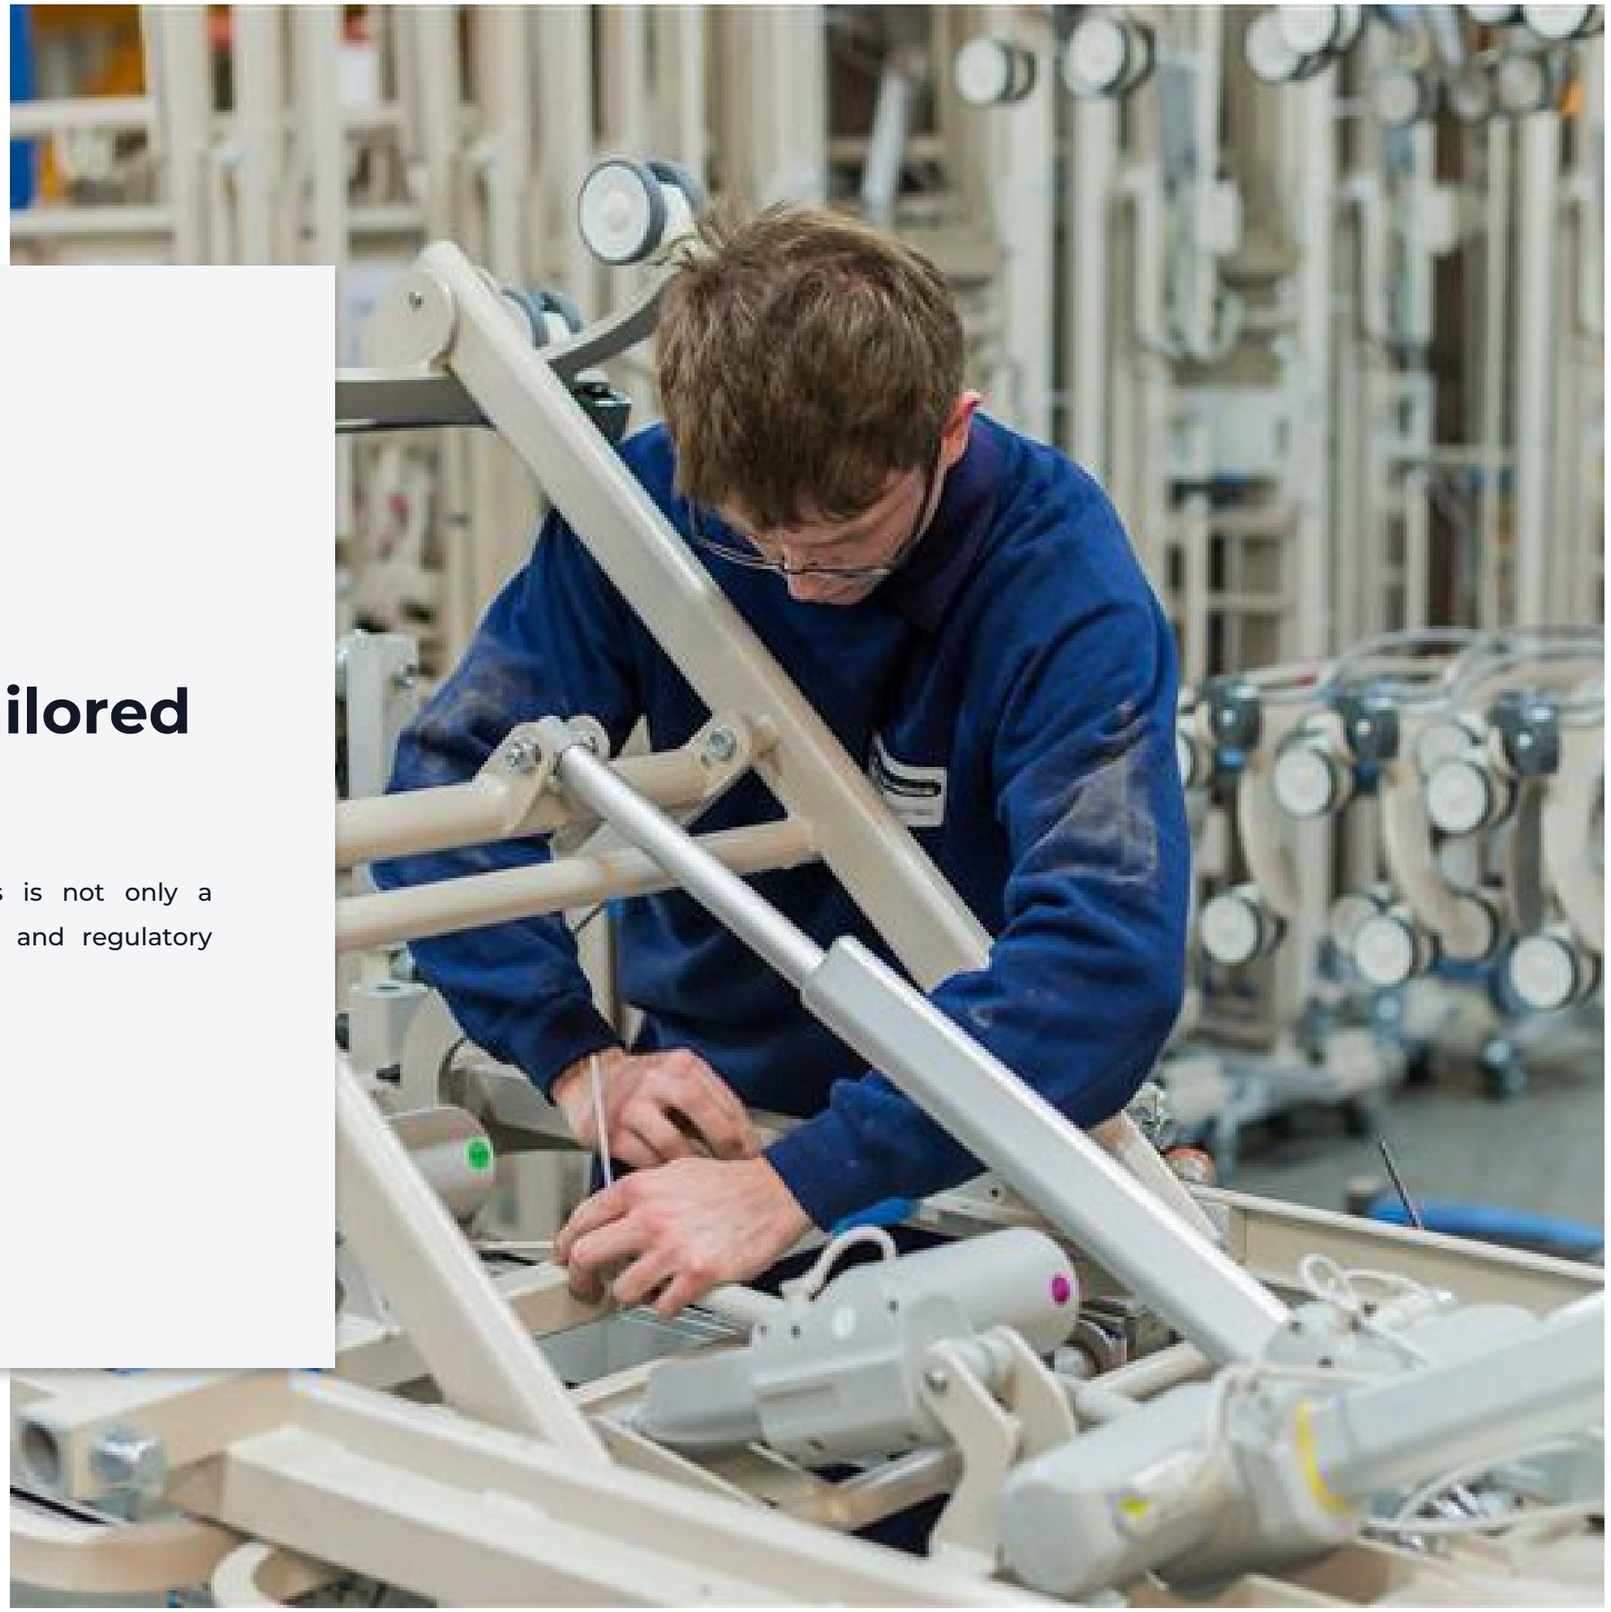
Preventive maintenance tailored to your needs

The maintenance of medical devices is not only a **technical obligation**, but also a **legal** and regulatory responsibility of the organisation.

It is based on:

- A clear policy
- Traceability procedures
- The use of compliant parts
- And staff training



The advantages of preventive maintenance

THE BENEFITS OF REGULAR MAINTENANCE OF YOUR EQUIPMENT

- Improved performance: maximum fleet availability.
- Improved quality: a reliable and continuous service.
- Lower costs: reduced repair costs.
- Fewer breakdowns: continuity guaranteed.

EXTEND THE LIFESPAN OF YOUR EQUIPMENT & ENSURE SAFETY

Our maintenance programmes are designed to:
- Ensure your equipment performs to its full potential.
- Provide regular checks and reliable diagnostics.
- Safeguard the safety of patients, residents and carers.
- Maintain your organisation’s regulatory compliance.

A BUDGET UNDER CONTROL

Our maintenance solutions help you to:
- Plan your expenditure.
- Avoid unexpected costs.
- Optimise your investments with complete transparency.

CERTIFIED COMPONENTS FOR SUSTAINABLE VIABILITY

All our services are carried out using original parts that have been tested and approved, guaranteeing:
- Maximum safety when using your equipment.
- Strict compliance with regulatory standards.
- The durability and reliability of your beds, mattresses and accessories.

Our preventive maintenance services

A SINGLE POINT OF CONTACT FOR A COMPREHENSIVE SOLUTION

From pre-sales to after-sales, we support you every step of the way.

Through a **detailed analysis** of your needs, we provide **tailored technical support**, based on a **long-term** and **effective** partnership.

EXPERTS AT YOUR SIDE

Our technicians and engineers, who receive regular training in the latest innovations, guarantee you:
- A responsive, high-quality service.
- Professional installation of your equipment.
- Comprehensive training for your teams, delivered directly on-site.

OUR TECHNICIANS CARRY OUT A FULL INSPECTION

- Mechanical inspection: assembly, joints, brakes, locking mechanisms.
- Electrical inspection: components, controls, sensors.
- Safety features: barriers, locking systems, protective devices.
- Lubrication: re-greasing of all pivot points.
- Electrical tests: carried out in accordance with current standards.

Each operation (inspection, adjustment, replacement) is recorded in the technician’s maintenance report.

RENOVATION OF THE PARK

Following the visit, our preventive maintenance team will email you the **maintenance report** completed for each piece of equipment.
The **service reports** are sent to your HAcare contact, who will draw up the necessary quotes for repairs or replacements.

This provides you with **comprehensive** and **transparent** tracking of the **maintenance** of your equipment fleet.

The result: a clear and traceable process that guarantees the safety, compliance and availability of your equipment. Translated with DeepL.com (free version)
