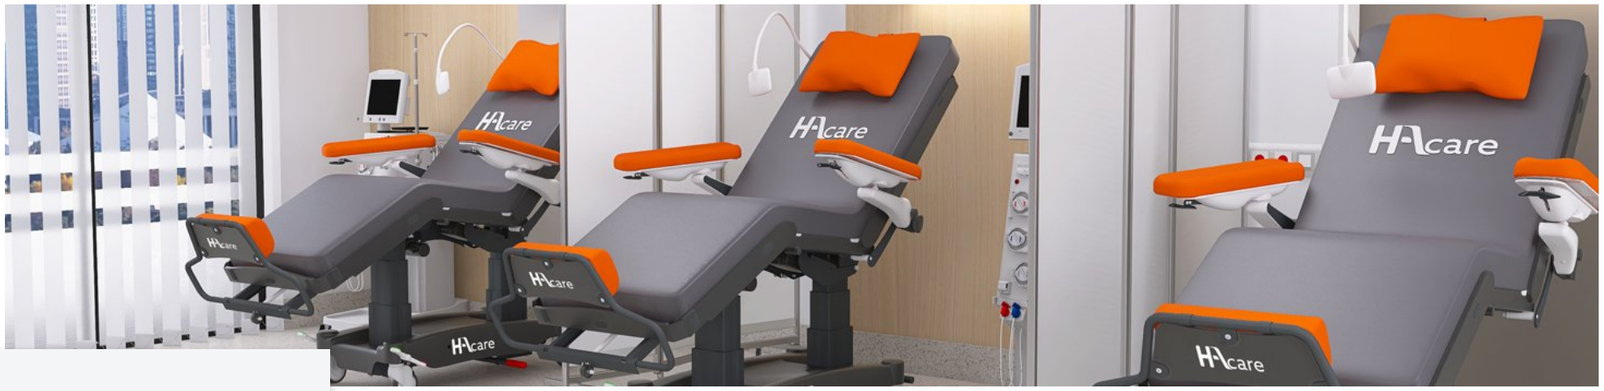
HAcare, specialist in medical devices since 1860.

At HAcare, we design, manufacture and distribute medical devices and innovative, durable medical furniture solutions designed to improve the daily lives of patients and healthcare professionals alike.



The HAcare Group's eco-responsible commitments

The HAcare group commits to an **eco-responsible industrial orientation**

In its sustainable development strategy, the HAcare group has defined a list of **6 commitments** that guide its **actions and decisions** since the group's creation and for the years to come.

Indicators have been set up for each commitment.

Our 6 commitments

- Made in France production
- The use of renewable resources
- Integrating the circular economy into all new product developments
- Responsible purchasing (supplier quality monitoring)
- Daily actions to respect and protect the environment
- Combating RSI and noise pollution through our products

Choose the circular economy

HAcare finished products can be recycled through a recovery circuit at the end customer's premises, for recycling with our partner supplier. As wood cannot be recycled ad infinitum because its fibers become too small or exhausted, wood waste is recovered and transformed into green energy.

The plant fiber boards used in the manufacture of HAcare products are 100% reclaimed wood. Each HAcare finished product bears an index revealing the proportion of plant fiber contained.

Recycling is the practice of recovering used materials from the waste stream, then incorporating these same materials into the manufacturing process. Each HAcare finished product carries an index revealing the proportion of recycled material it contains.

Recyclable materials

HAcare finished products are 95% recyclable. For example, the HAcare medical bed is entirely recyclable, except for the wheels and motors. Each bed can be dismantled to recover each material separately: plant fiber, metal, plastic.

PLANT FIBER

Recycled wood

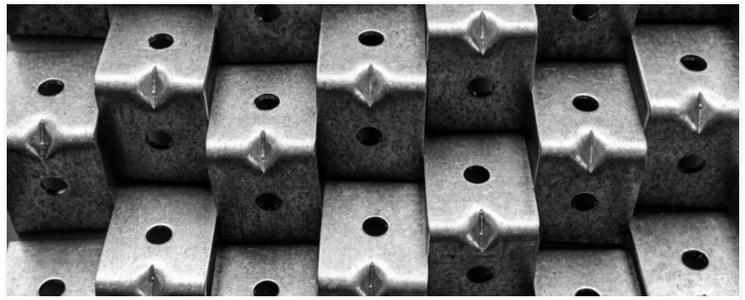
The plant fiber boards used in the manufacture of HAcare Group products are:

100% reused wood

Reuse is one of the environmentally friendly processes. It involves, for example, leftovers from wood-processing companies (e.g. sawmill scraps, production offcuts...). But also by-products from activities such as sustainable forest management and slope maintenance.

100% FSC-certified wood

Recyclable with a partner supplier who, on a worldwide exclusive basis and since 2021, recycles MDF and HDF panels.No water consumption, nor green energy **biomass**.



The metal

All metal components are **recyclable** and reusable, **infinitely**. Once the metal has been sorted, it is compressed, crushed, rolled and melted. It is then remolded into coils, bars or wire for reuse. This process can be endless!

Metal recycling has **many advantages**. It conserves natural resources by reducing the need for virgin materials, cuts energy consumption and reduces **greenhouse gas emissions**.

Recycled plastic

At recycling plants, waste (re) becomes a **raw material** through various processes: grinding, micronization, regeneration of plastics.

The recycled plastic will then be resold to **plasturgy** manufacturers in the form of **flakes**, powder or even **granules**.

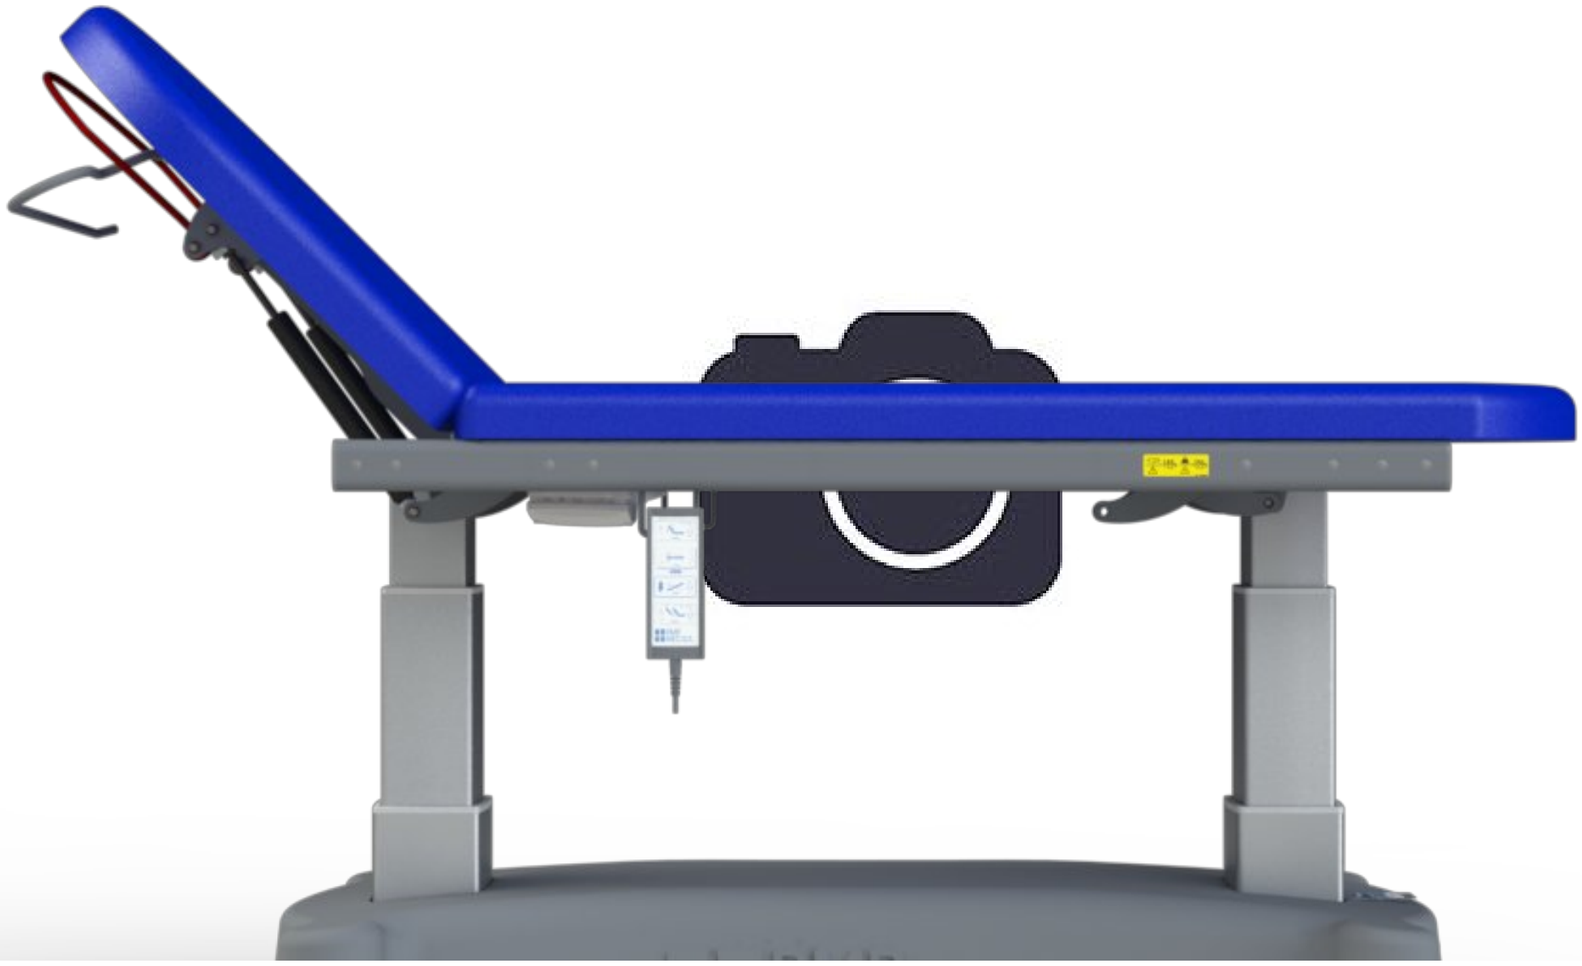
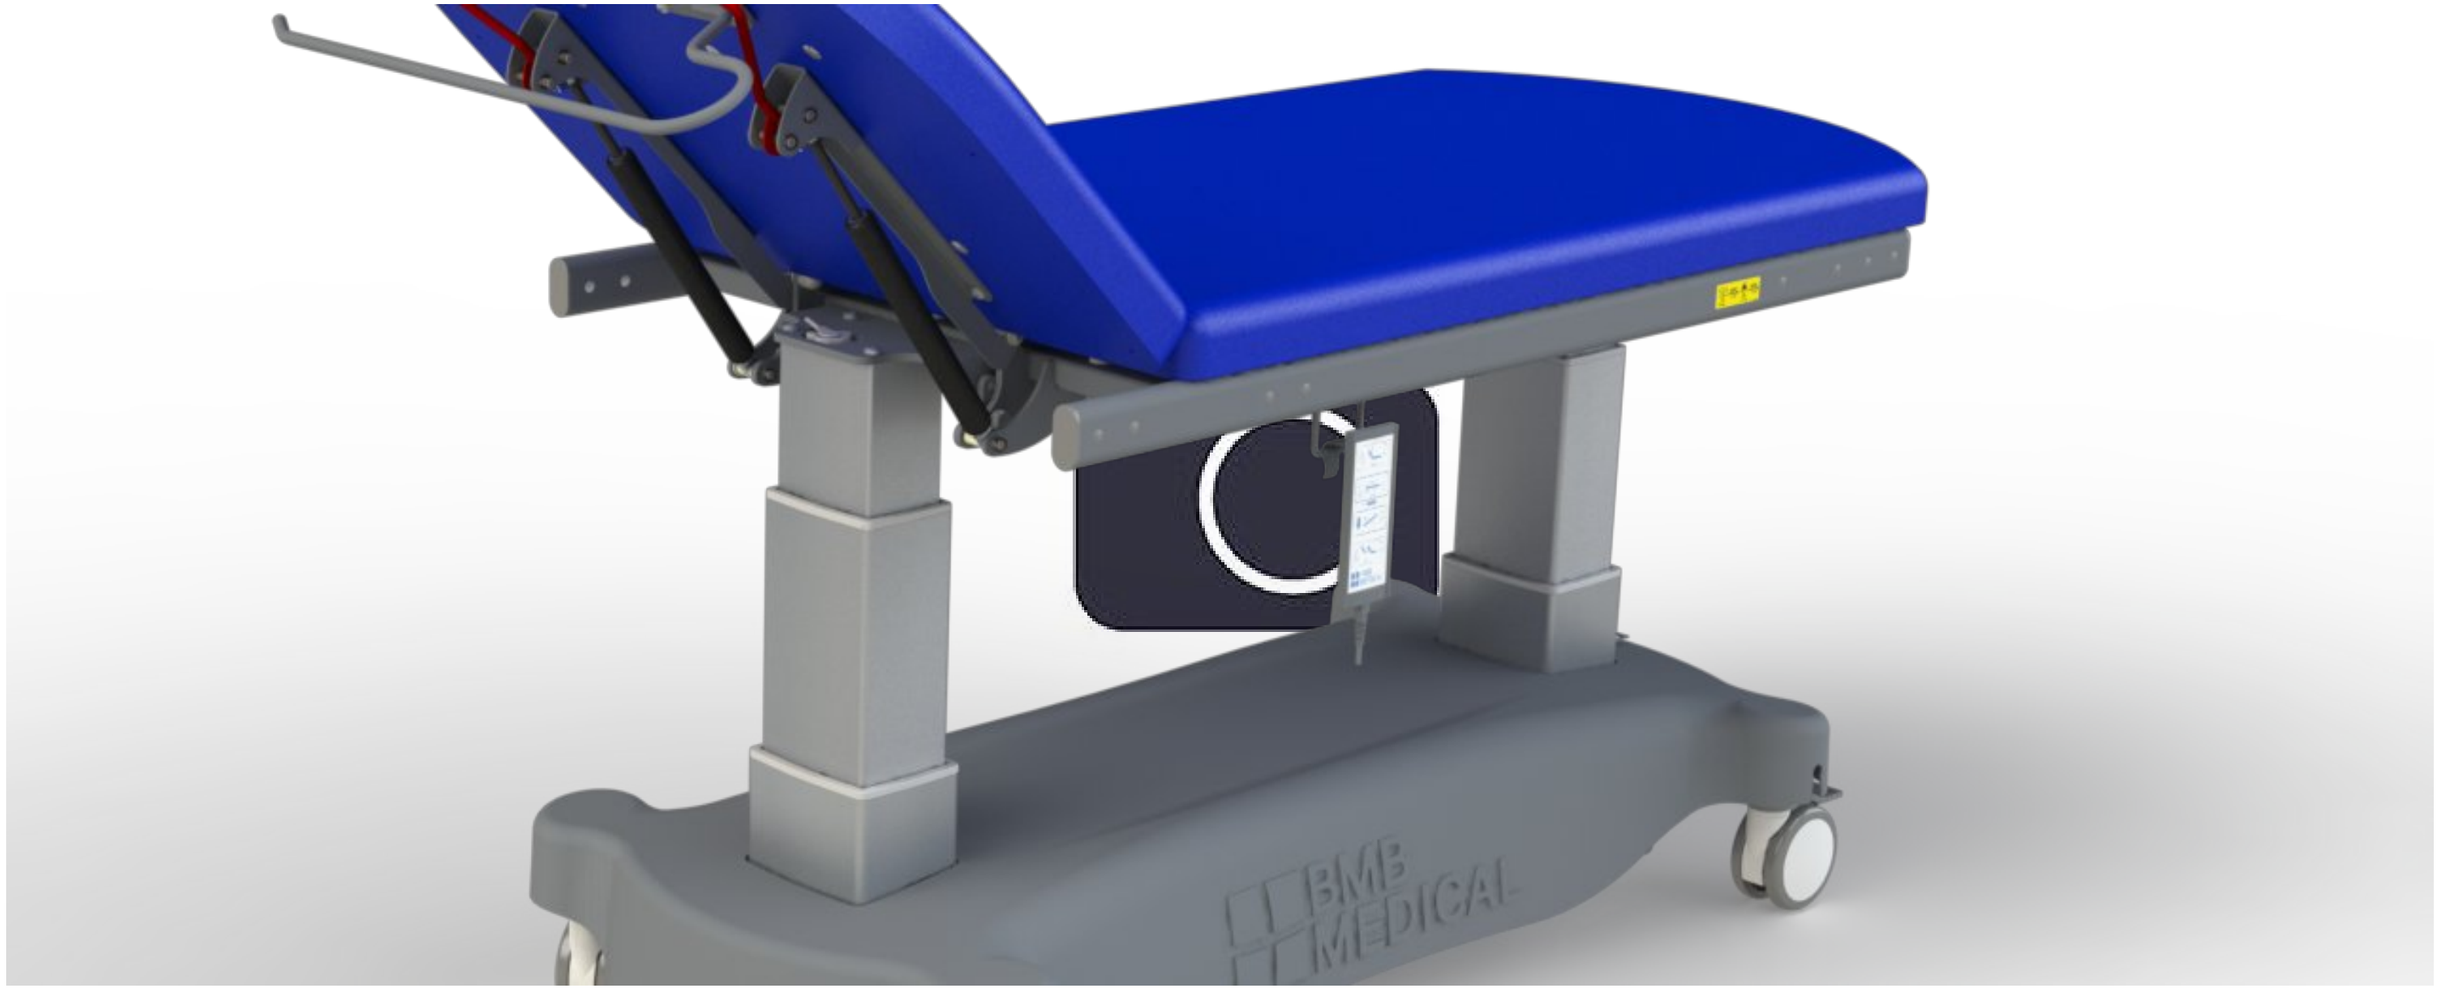
HIGHLIGHTS

Double column stability (Double column stability)



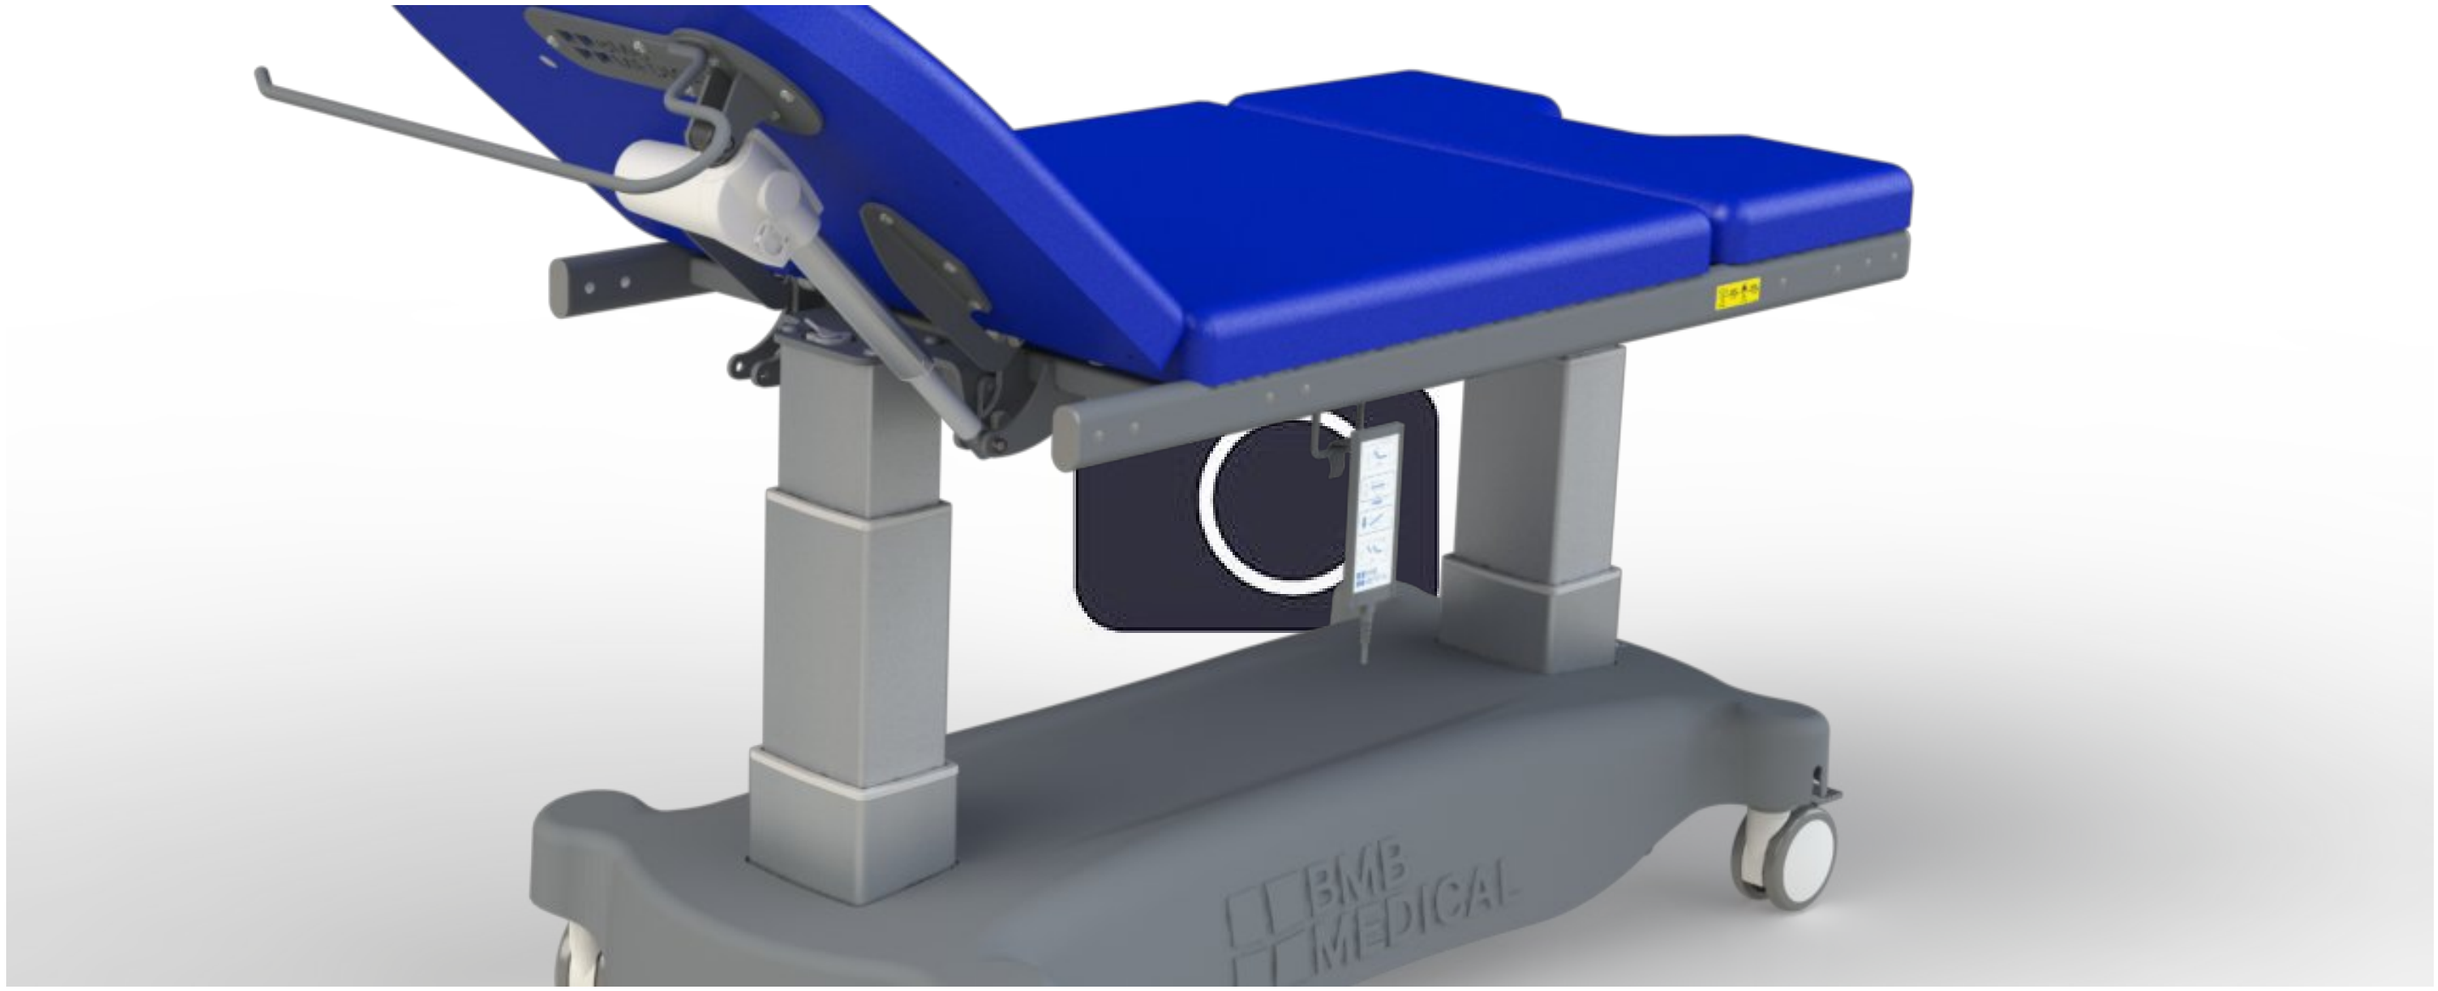
Double column stability

Patient comfort (Comfort)



- The **high-resilience foam** upholstery **with a density of 35 kg/m³**, combined with a total thickness of 6.5 cm, guarantees a soft yet stable seat. This comfort is appreciated for both quick consultations and longer examinations.
  Our examination couch is available in **two widths, 65 or 75 cm**, so that the patient is well positioned and secure regardless of their size.
-

Caregiver comfort (Patient safety)



Ergonomic design to reduce caregiver fatigue.

With its variable height adjustment ranging from 47 to 87 cm, DIVIA allows the position of the couch to be adapted to each medical procedure. The electric Trendelenburg/Reverse Trendelenburg positions and backrest elevation up to 80° also facilitate examinations, while reducing physical strain on staff.
→ Each caregiver works at the right height, without postural constraints.

Technical specifications

WEIGHT - ECO-PERFORMANCE

Weight	80 kg

DIMENSIONS

Length	205 cm
Width	73 / 84 with option centralized brake system cm
Length sleeping surface	200 cm
Width sleeping surface	65 cm
Variable height minimum	With castors diameter 125 mm: 47 / With castors diameter 150 mm: 49 cm
Variable height maximum	With castors diameter 125 mm: 87 / With castors diameter 150 mm: 89 cm
Ground Clearance	2,3 (castor diameter 125 mm) / 4,1 (castor diameter 150 mm) cm
Dimensions (cm)	Backrest 65 x 69 cm cm
Mattress thickness	6,5 (5 cm foam + 1,5 cm wood) cm

LYING SURFACE

Lying surface - Material	Resilience foam on wooden base

MATERIAL & COATING

Material Foam	Resilience foam
Foam HR density	35 kg/m3
Material Cover	Seamless finish, vinyl coating antibacterial
Frame	Frame protection cover / Machine-welded steel frame, epoxy coated
Variable height	Steel column

TYPE

Variable height type	PI-Type
Type of engine	Electric
Type of brake	Individual brake

BASE

Type of footing	Castor - Double roller
Wheels diameter	125 mm

INCLINATIONS

Backrest	(2 gas spring) 0 to 80°
Reverse Trendelenburg	15°
Trendelenburg	15°

SAFETY CHARGE

Maximum patient weight	185 kg
SWL	250 kg

CONFIGURATION

Configuration	Examination towel dispenser head end

COLORS

Mattress filling	Range of colors Valencia

REGULATION

Medical device class	Class I
CE marking	Yes
European regulation (UE 2017/745)	Yes

FIRE CLASSIFICATION

Mattress cover	M2 standard / M1 optional

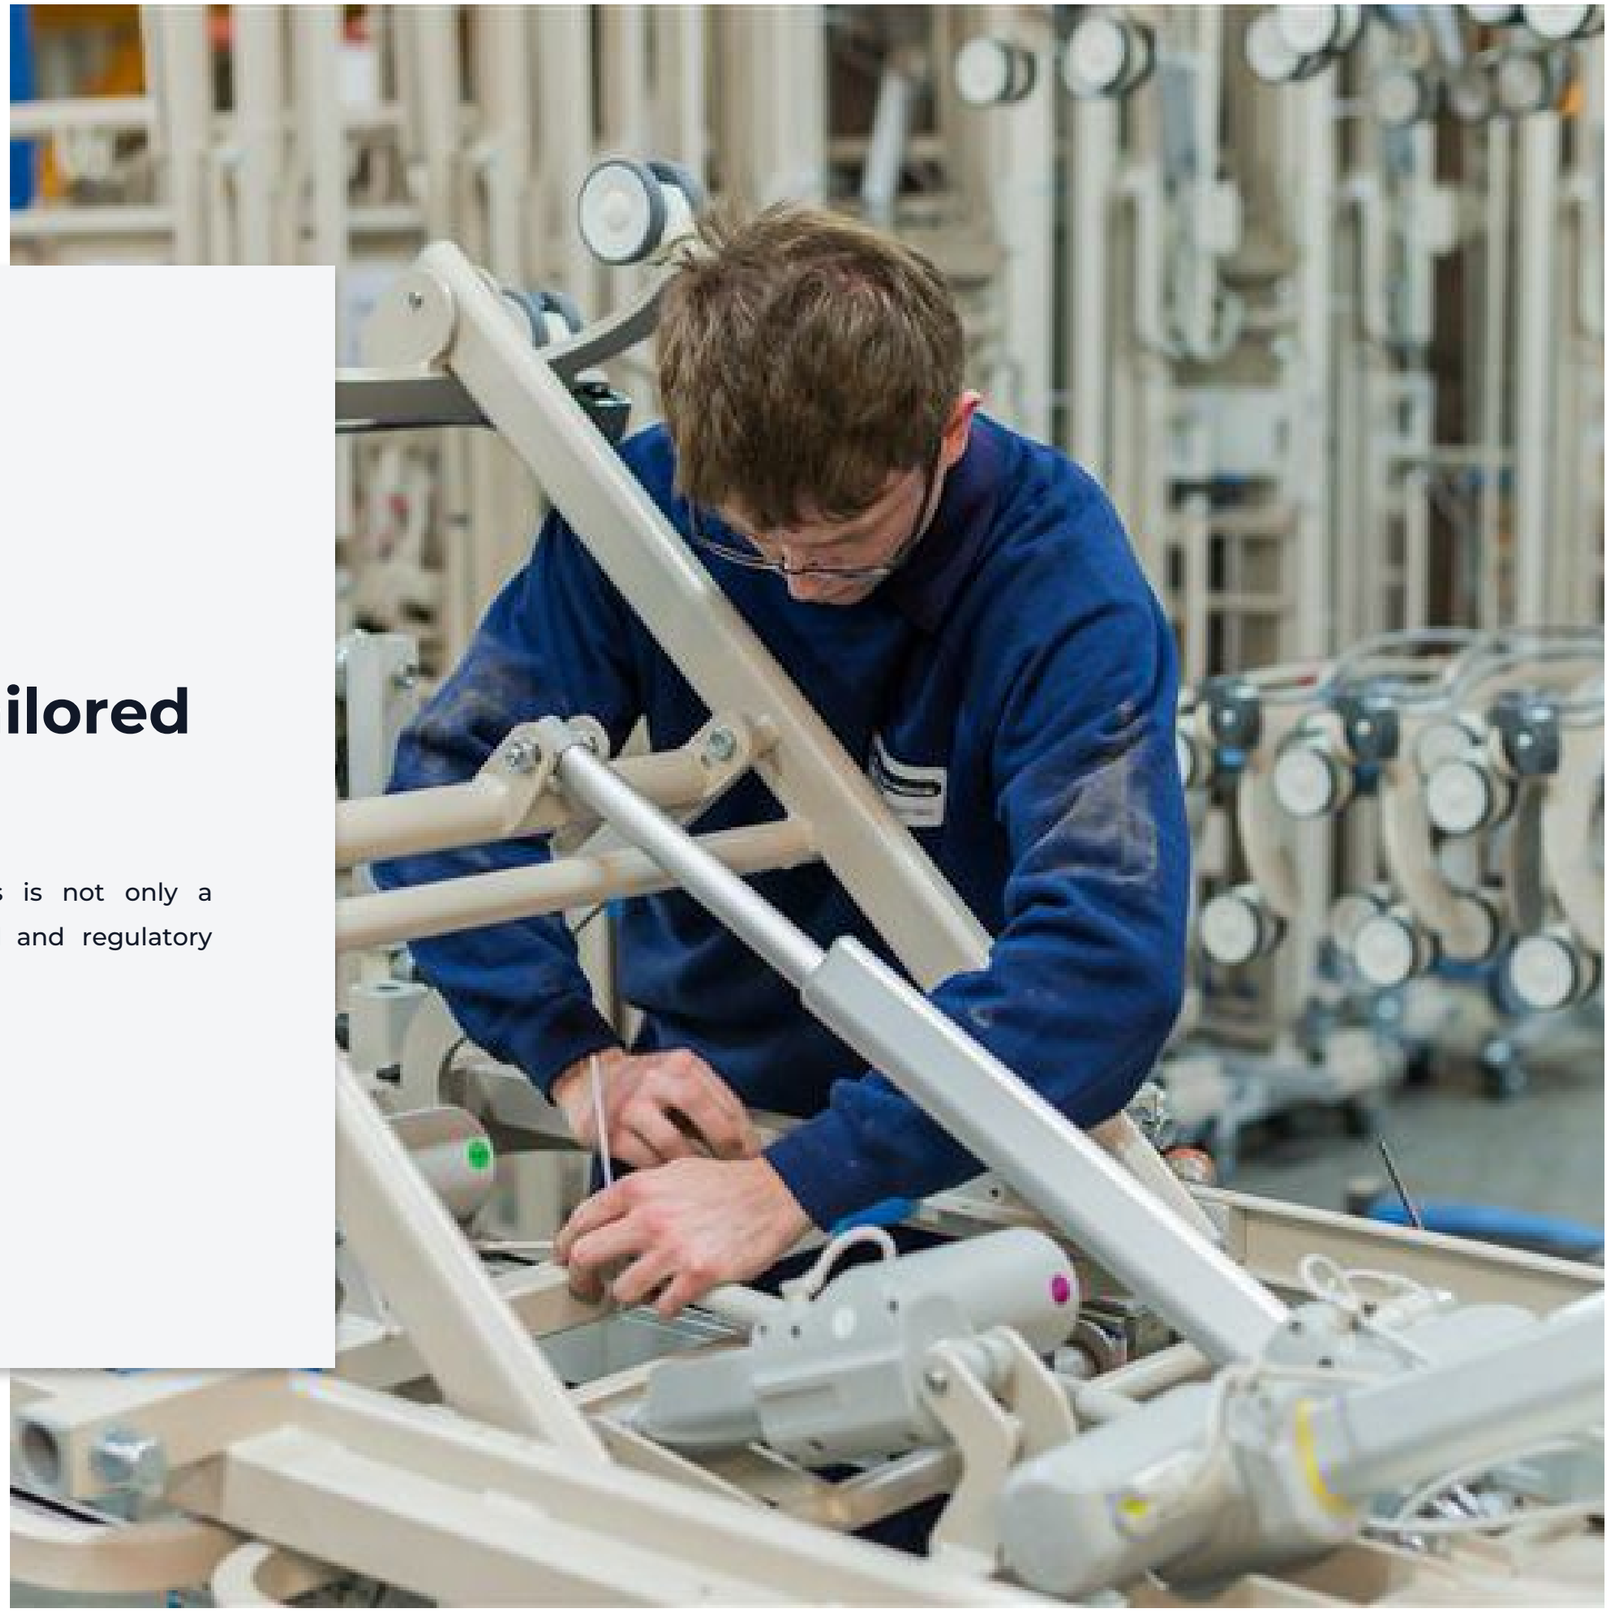
Preventive maintenance tailored to your needs

The maintenance of medical devices is not only a **technical obligation**, but also a **legal** and regulatory responsibility of the organisation.

It is based on:

- A clear policy
- Traceability procedures
- The use of compliant parts
- And staff training



The advantages of preventive maintenance

THE BENEFITS OF REGULAR MAINTENANCE OF YOUR EQUIPMENT

- Improved performance: maximum fleet availability.
- Improved quality: a reliable and continuous service.
- Lower costs: reduced repair costs.
- Fewer breakdowns: continuity guaranteed.

EXTEND THE LIFESPAN OF YOUR EQUIPMENT & ENSURE SAFETY

Our maintenance programmes are designed to:
- Ensure your equipment performs to its full potential.
- Provide regular checks and reliable diagnostics.
- Safeguard the safety of patients, residents and carers.
- Maintain your organisation’s regulatory compliance.

A BUDGET UNDER CONTROL

Our maintenance solutions help you to:
- Plan your expenditure.
- Avoid unexpected costs.
- Optimise your investments with complete transparency.

CERTIFIED COMPONENTS FOR SUSTAINABLE VIABILITY

All our services are carried out using original parts that have been tested and approved, guaranteeing:
- Maximum safety when using your equipment.
- Strict compliance with regulatory standards.
- The durability and reliability of your beds, mattresses and accessories.

Our preventive maintenance services

A SINGLE POINT OF CONTACT FOR A COMPREHENSIVE SOLUTION

From pre-sales to after-sales, we support you every step of the way.

Through a **detailed analysis** of your needs, we provide **tailored technical support**, based on a **long-term** and **effective** partnership.

EXPERTS AT YOUR SIDE

Our technicians and engineers, who receive regular training in the latest innovations, guarantee you:
- A responsive, high-quality service.
- Professional installation of your equipment.
- Comprehensive training for your teams, delivered directly on-site.

OUR TECHNICIANS CARRY OUT A FULL INSPECTION

- Mechanical inspection: assembly, joints, brakes, locking mechanisms.
- Electrical inspection: components, controls, sensors.
- Safety features: barriers, locking systems, protective devices.
- Lubrication: re-greasing of all pivot points.
- Electrical tests: carried out in accordance with current standards.

Each operation (inspection, adjustment, replacement) is recorded in the technician’s maintenance report.

RENOVATION OF THE PARK

Following the visit, our preventive maintenance team will email you the **maintenance report** completed for each piece of equipment.
The **service reports** are sent to your HAcare contact, who will draw up the necessary quotes for repairs or replacements.

This provides you with **comprehensive** and **transparent** tracking of the **maintenance** of your equipment fleet.

The result: a clear and traceable process that guarantees the safety, compliance and availability of your equipment. Translated with DeepL.com (free version)
