Our preventive maintenance services 58

HAcare, specialist in medical devices since 1860.

At HAcare, we design, manufacture and distribute medical devices and innovative, durable medical furniture solutions designed to improve the daily lives of patients and healthcare professionals alike.

The HAcare Group's eco-responsible commitments

The HAcare group commits to an **eco-responsible industrial orientation**

In its sustainable development strategy, the HAcare group has defined a list of **6 commitments** that guide its **actions and decisions** since the group's creation and for the years to come.

Indicators have been set up for each commitment.

Our 6 commitments

- Made in France production
- The use of renewable resources
- Integrating the circular economy into all new product developments
- Responsible purchasing (supplier quality monitoring)
- Daily actions to respect and protect the environment
- Combating RSI and noise pollution through our products

Choose the circular economy

HAcare finished products can be recycled through a recovery circuit at the end customer's premises, for recycling with our partner supplier. As wood cannot be recycled ad infinitum because its fibers become too small or exhausted, wood waste is recovered and transformed into green energy.

The plant fiber boards used in the manufacture of HAcare products are 100% reclaimed wood. Each HAcare finished product bears an index revealing the proportion of plant fiber contained.

Recycling is the practice of recovering used materials from the waste stream, then incorporating these same materials into the manufacturing process. Each HAcare finished product carries an index revealing the proportion of recycled material it contains.

Recyclable materials

HAcare finished products are 95% recyclable. For example, the HAcare medical bed is entirely recyclable, except for the wheels and motors. Each bed can be dismantled to recover each material separately: plant fiber, metal, plastic.

PLANT FIBER

Recycled wood

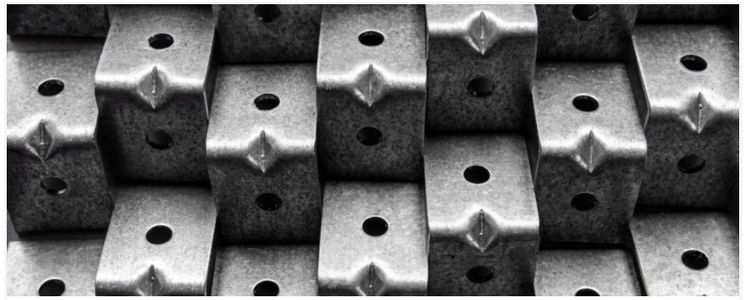

The plant fiber boards used in the manufacture of HAcare Group products are:

100% reused wood

Reuse is one of the environmentally friendly processes. It involves, for example, leftovers from wood-processing companies (e.g. sawmill scraps, production offcuts...). But also by-products from activities such as sustainable forest management and slope maintenance.

100% FSC-certified wood

Recyclable with a partner supplier who, on a worldwide exclusive basis and since 2021, recycles MDF and HDF panels.No water consumption, nor green energy **biomass**.

The metal

All metal components are **recyclable** and reusable, **infinitely**. Once the metal has been sorted, it is compressed, crushed, rolled and melted. It is then remolded into coils, bars or wire for reuse. This process can be endless!

Metal recycling has **many advantages**. It conserves natural resources by reducing the need for virgin materials, cuts energy consumption and reduces **greenhouse gas emissions**.

Recycled plastic

At recycling plants, waste (re) becomes a **raw material** through various processes: grinding, micronization, regeneration of plastics.

The recycled plastic will then be resold to **plasturgy** manufacturers in the form of **flakes**, powder or even **granules**.

Open care trolleys - MM3 (STOCK'ALLI)

OUR EXCLUSIVES

OUR EXCLUSIVES

P20

In hospital environments, optimizing space is a major challenge. Teams must manage a large volume of medical equipment in often limited space, while maintaining a smooth, intuitive organization that complies with hygiene requirements. Storage solutions must therefore be compact, modular, and allow quick access to the products needed for patient care.

Optimize storage with the P20 concept

This **transport** trolley guarantees **space-efficient** filling thanks to the **P20 concept.**

12x 50mm

9x 75mm

9x

OUR EXCLUSIVES

Easy CLEAN

In a hospital setting where hygiene is an absolute imperative, every minute spent cleaning counts. Healthcare staff are faced with the need to ensure rigorous disinfection while maintaining a sustained pace of work. The EasyClean® solution addresses this challenge by making cleaning easier. Hygiene protocols are followed without compromise, while reducing the workload for staff. The result: less effort, less time wasted, and enhanced safety for both patients and caregivers.

EASY CLEAN®

Make cleaning easier

Tool-free disassembly for quick and thorough cleaning, prevents any residue build-up for **perfect hygiene** and offers **time saving** for nursing staff.

HIGHLIGHTS

EasyMOV (Easy MOV)

EASY MOV'

Designed to combine ease of use and performance, our medical furniture offers **optimal maneuverability** thanks to push handles that make it easy to **grip**.

Every movement is made easier, reducing fatigue and protecting the health of users on a daily basis.

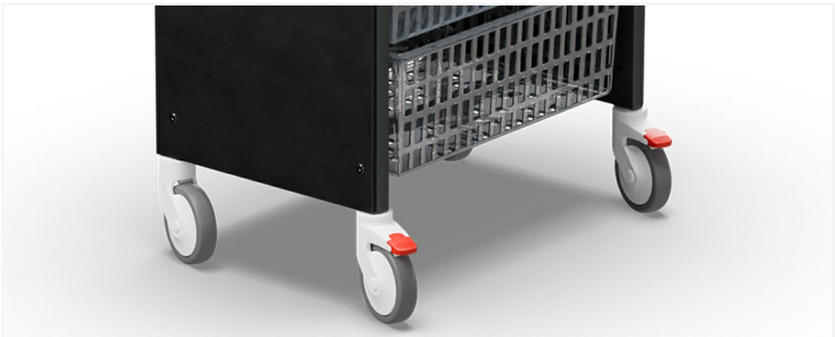

Designed to **limit musculoskeletal disorders** (MSDs), it allows caregivers to work in better ergonomic conditions, while ensuring the safety and stability of the equipment being transported.

CHARACTERISTICS

CHARACTERISTICS

Mobility

4 casters, 2 of which have brakes

The medical furniture adapts to any environment thanks to its four 75 mm or 100 mm **casters**, which **optimize mobility** and **comfort**.

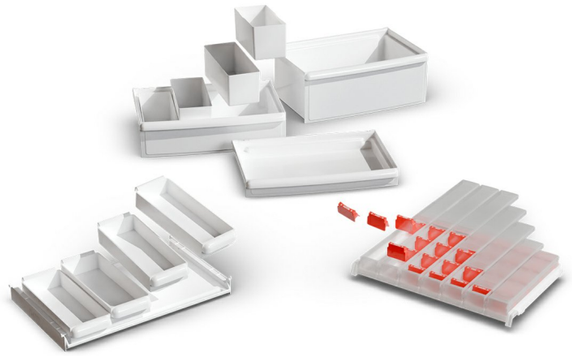

The **two front brakes**, easily accessible by foot, ensure **perfect stability** during care or preparation, enhancing the **safety** of the furniture and the confidence of caregivers in their actions.

CHARACTERISTICS

Configurable

Modularity for large storage capacity

HACARE **modular** furniture allows for **vertical storage** and **optimizes** every **square inch**, even in confined spaces. Thanks to the **P20 system**, teams **can** freely **mix** BJMM/BJGM **trays**, three **drawer** heights, and three **lip trays**. A **flexible**, **compact** organization**.**

Selecting components for customized storage

Configure your medical furniture according to your **needs** with a wide range of **modular components**. Create a **tailor-made solution that** is perfectly suited to your everyday use. Each element is designed to **optimize** your organization, your working **comfort**, and the **efficiency** of care, while ensuring optimal ergonomics. Complete customization for **furniture** that **is scalable, durable**, and perfectly suited to the requirements of your department.

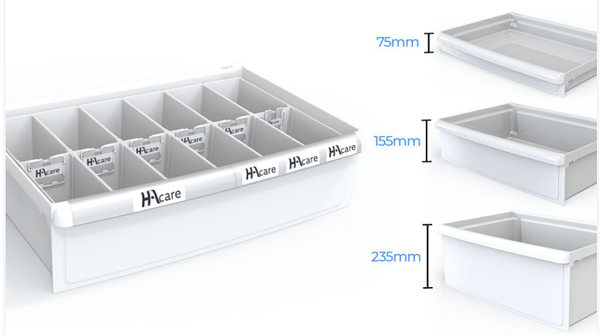

Selecting type configurations

Thanks to **our expertise** in medical furniture, we design **"type" configurations** for every use. Careful selection of **components**, optimized layout, ergonomics, and user comfort: everything is designed to meet the specific needs of each department. **Our team will help you** define the configuration best suited to your practices, combining functionality, durability, and everyday efficiency.

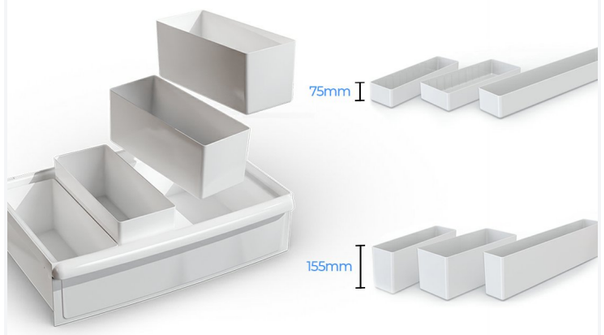

The **adjoining drawers protect** the contents of the drawers **from** prying **eyes**, **light**, and **UV** rays, thus preserving the quality and **confidentiality** of the stored products.

Thanks to the **centralized locking** system, opening and closing can be done in **a single step**, simplifying the work of staff while enhancing security.
The **removable drawers** can be **cleaned in an autoclave**, and the **rounded corners** make cleaning easier.
A practical and reliable solution that combines protection, efficiency, and peace of mind on a daily basis.

Ergonomic drawers

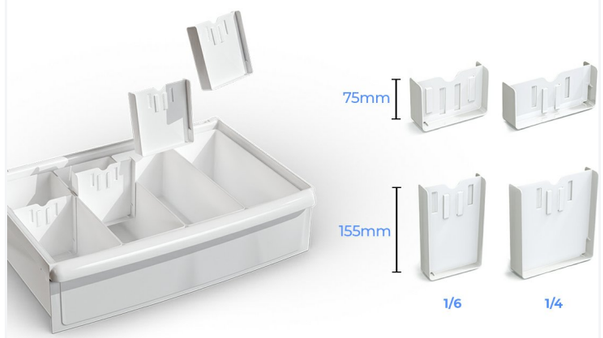

The medical furniture **adapts** to any healthcare organization thanks to its **customizable configurations**. Choose from three drawer heights and **freely configure** the interior layout to suit your needs.

Separation bins

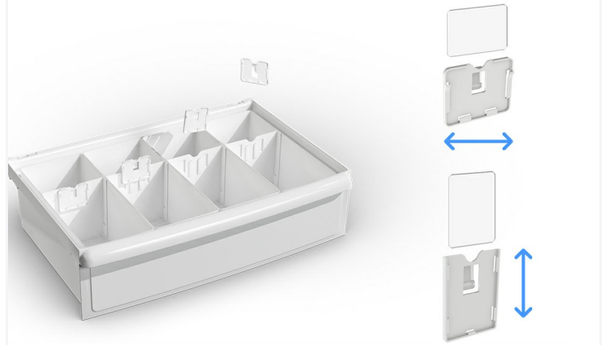

The medical furniture adapts to **any** healthcare **organization** thanks to its **customizable configurations.** Choose from three drawer heights and freely arrange the **interior layout** according to your needs with the **divider trays.**

A **flexible** and **scalable** design that **optimizes space,** improves ergonomics, and makes each care station more functional on a daily basis.

Separators

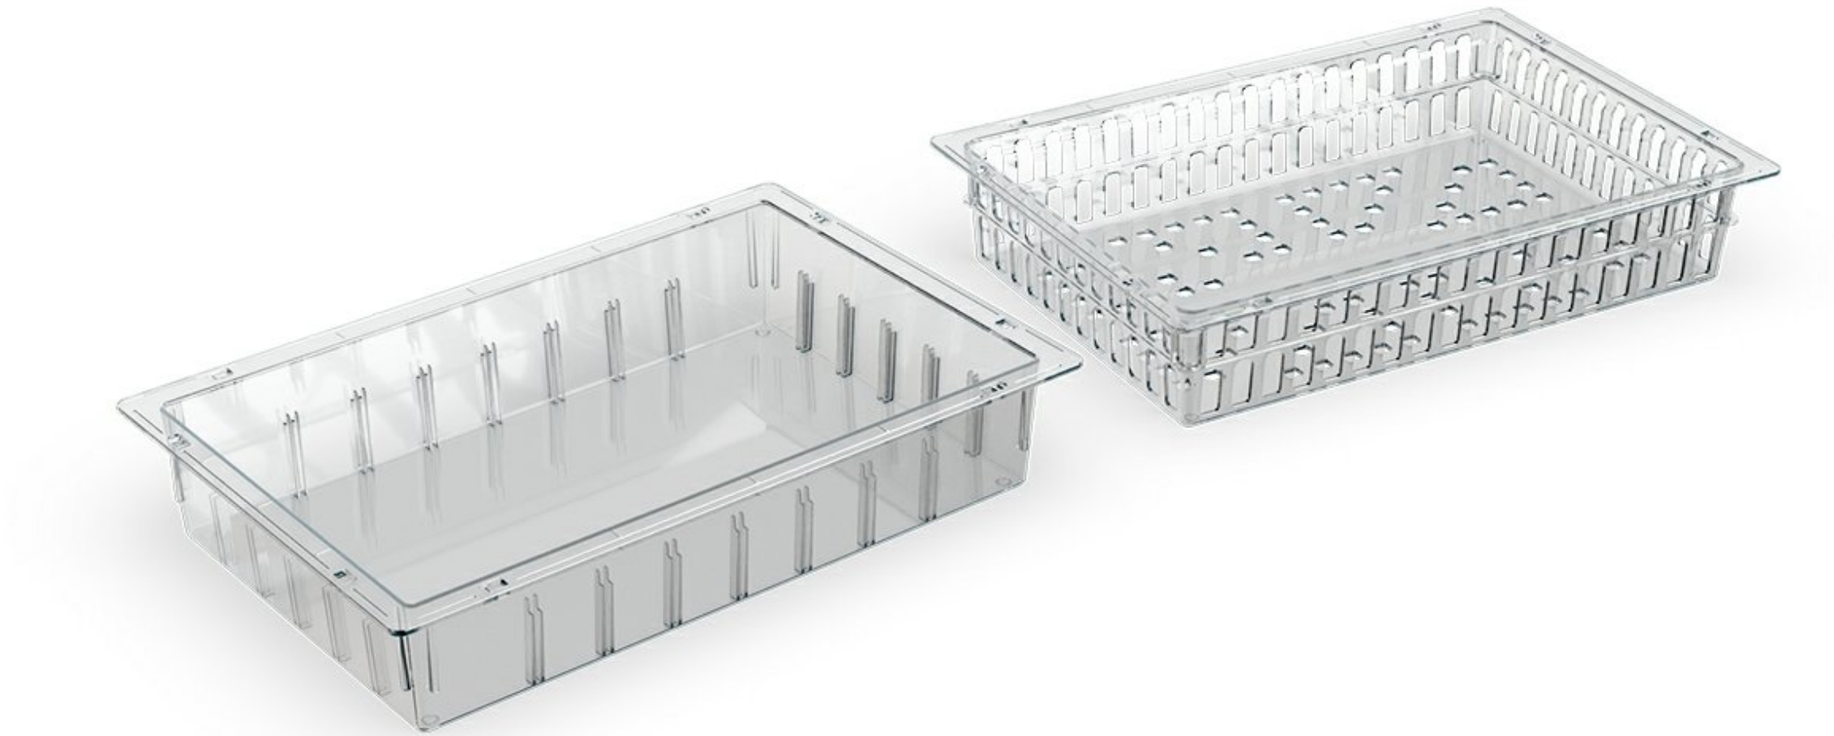

Freely **customize** the **interior layout** to suit your needs with dividers, **separators**, and subdivision boxes that isolate each care item for **greater safety**. A **flexible** and **scalable design** that **optimizes space**, improves ergonomics, and makes each care station more functional on a daily basis.

Label holders and labels

Label holders on medical furniture drawers facilitate **quick** and accurate **identification** of contents, **reducing errors** and optimizing **healthcare organization**. They enable **clear identification** of medications, medical devices, or supplies, thereby improving team **productivity** and **workflow**. Adaptable and **modular**, they contribute to a structured and **secure** care environment, while **simplifying** the **daily management** of equipment and enhancing the efficiency and safety of interventions.

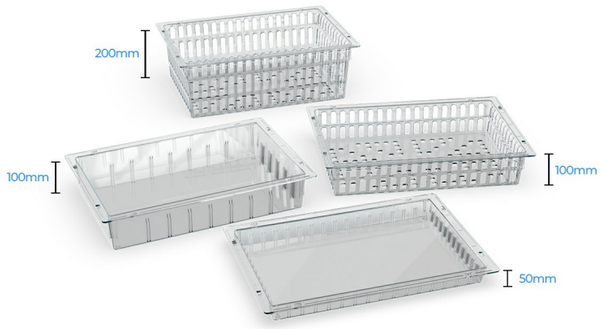

COMPOSANTS : Bac à lèvres

The tray, a universal and standardized storage solution, features a **rear groove** for **hanging**, creating an **isolated area** that limits liquid contamination. **Transparent** for **quick identification** of contents, it can be perforated for added lightness. It adapts to **all structures** and is **easy to clean,** offering a practical, hygienic, and functional solution for organization and safety in healthcare. Available in **three heights** to optimize storage.

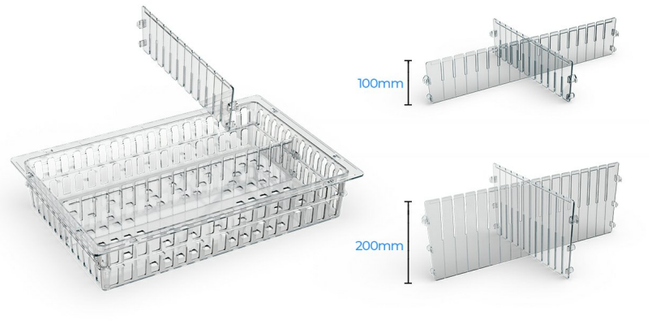

CHARACTERISTICS

COMPOSANTS : Bac à lèvres

Choosing your tray

Solid or openwork, **transparent** trays offer a secure and hygienic **storage solution** for medical furniture. Their closed design limits the risk of liquid contamination while allowing quick **visualization** of the contents. **Easy to clean**, they ensure durability and practicality for everyday use. Adaptable to **all** structures, they optimize the organization of instruments and consumables, while facilitating the work of healthcare teams. Lightweight and sturdy, they combine safety, ergonomics, and efficiency. Available in **three heights** to optimize storage.

Combs for Tray

Freely **customize** the **interior layout** of the tray according to your needs with the **divider combs** that separate each skincare product for greater safety.

A **flexible** and scalable **design** that optimizes space.

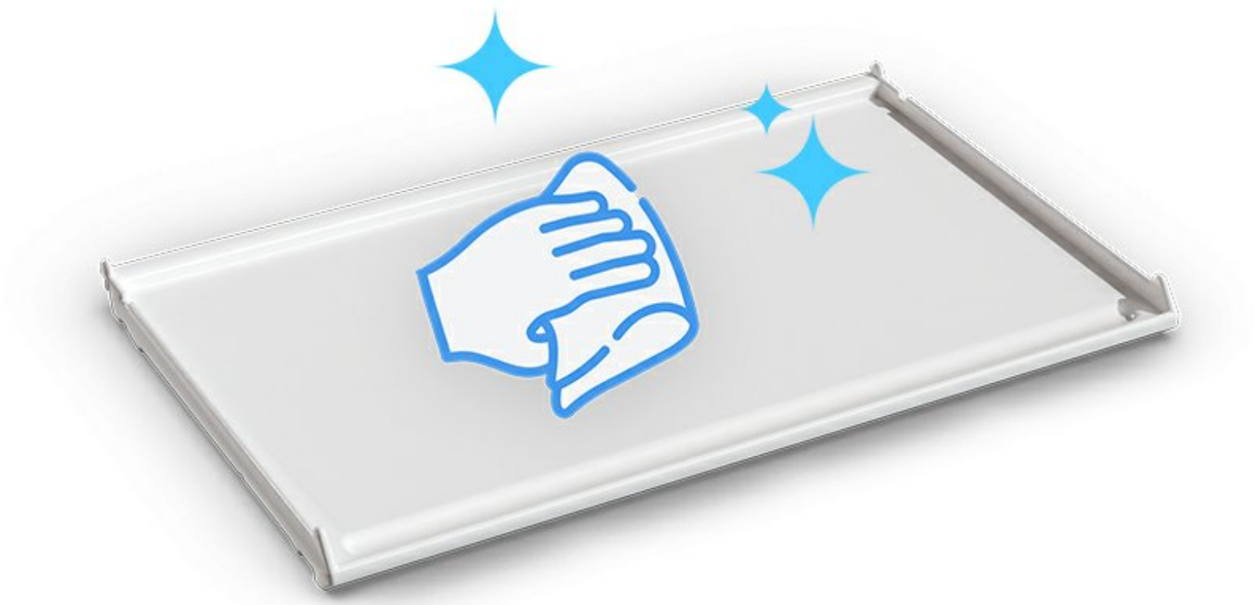

Several models are available to help you create your own organization system.

Label holders and labels

Label holders on medical furniture drawers facilitate **quick** and accurate **identification** of contents, **reducing errors** and optimizing **healthcare organization**. They enable **clear identification** of medications, medical devices, or supplies, thereby improving team **productivity** and **workflow**. Adaptable and **modular**, they contribute to a structured and **secure** care environment, while **simplifying** the **daily management** of equipment and enhancing the efficiency and safety of interventions.

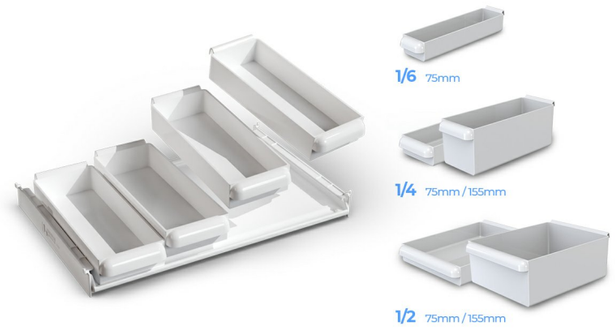

COMPOSANTS: Étagères

The modular **shelf** provides practical and accessible **storage space** for medical equipment. Designed to **optimize** the **organization** of instruments and consumables, it facilitates the daily work of healthcare teams. Robust and stable, it supports a variety of equipment while remaining **easy to clean**, ensuring hygiene and durability. **Adaptable** to different configurations, it allows for efficient **structuring** of the care space, providing **quick access** to essential equipment and contributing to a smooth, safe, and ergonomic working environment.

CHARACTERISTICS

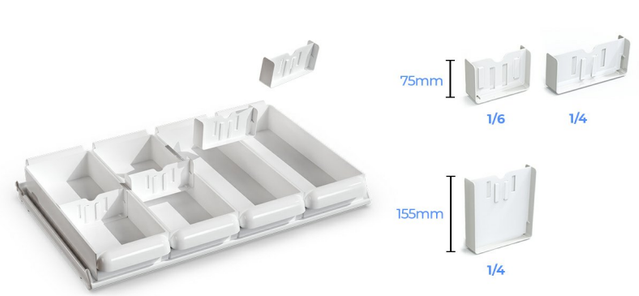

COMPOSANTS: Étagères

Separation bins

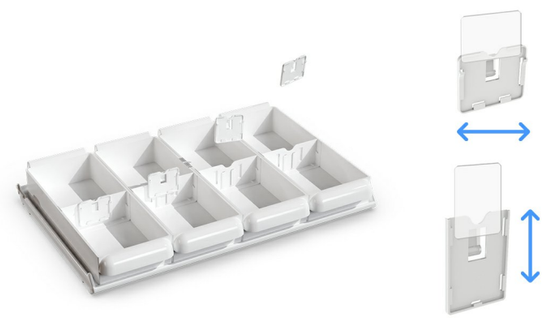

The medical furniture adapts to **any** healthcare **organization** thanks to its **customizable configurations.** Choose from three drawer heights and freely arrange the **interior layout** according to your needs with the **divider trays.**

A **flexible** and **scalable** design that **optimizes space,** improves ergonomics, and makes each care station more functional on a daily basis.

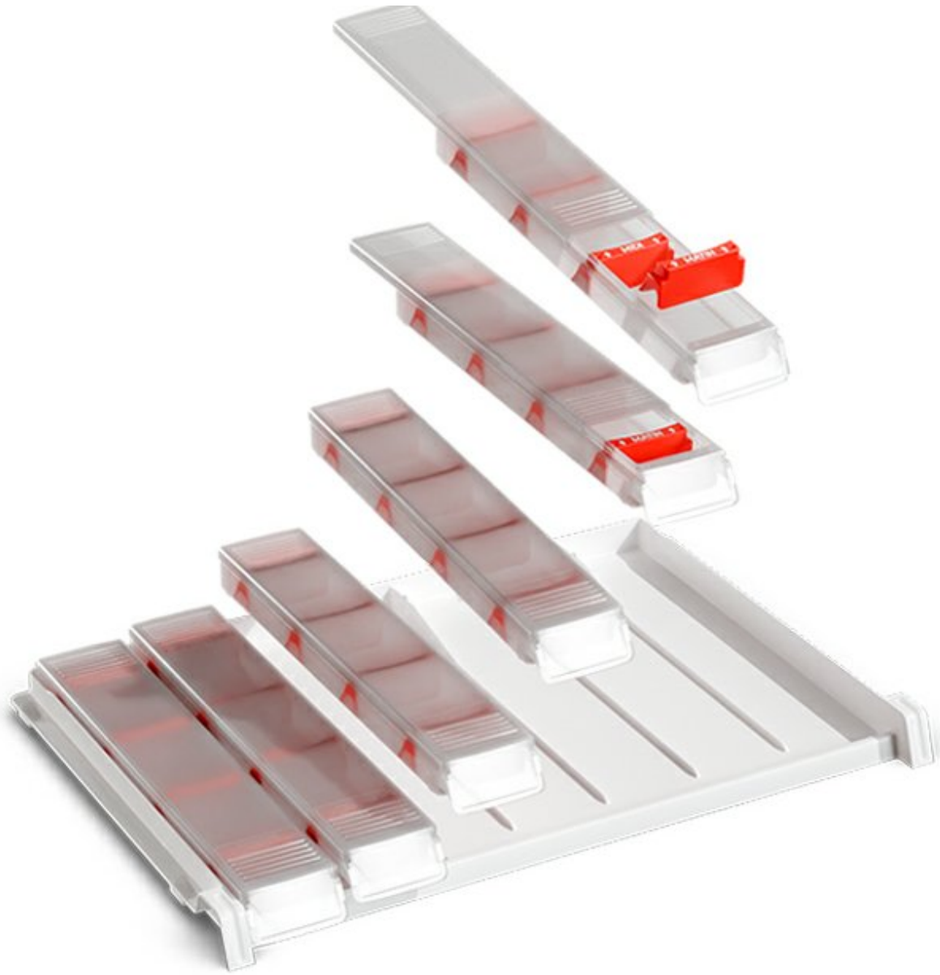

Separators

Freely **customize** the **interior layout** to suit your needs with dividers, **separators**, and subdivision boxes that isolate each care item for **greater safety**. A **flexible** and **scalable design** that **optimizes space**, improves ergonomics, and makes each care station more functional on a daily basis.

Label holders and labels

Label holders on medical furniture drawers facilitate **quick** and accurate **identification** of contents, **reducing errors** and optimizing **healthcare organization**. They enable **clear identification** of medications, medical devices, or supplies, thereby improving team **productivity** and **workflow**. Adaptable and **modular**, they contribute to a structured and **secure** care environment, while **simplifying** the **daily management** of equipment and enhancing the efficiency and safety of interventions.

The **BJMM** or **BJGM 7-compartment pill** dispensers enable clear and organized **dispensing of medication** for each patient. Functional and modular, they can be **supplemented** with one or more **drawers** for "**as needed**" treatment or for **storing** small medical **equipment** (blood pressure monitor, gloves, consumables, etc.). A practical solution for optimizing the preparation and distribution of daily treatments.

Label holders and labels

Label holders on medical furniture drawers facilitate **quick** and accurate **identification** of contents, **reducing errors** and optimizing **healthcare organization**. They enable **clear identification** of medications, medical devices, or supplies, thereby improving team **productivity** and **workflow**. Adaptable and **modular**, they contribute to a structured and **secure** care environment, while **simplifying** the **daily management** of equipment and enhancing the efficiency and safety of interventions.

COMPONENTS: Cassette

The secure cassette provides fixed, **tamper-proof storage space**, ideal for sensitive products. Its **locking** system, which can be activated at any height, guarantees enhanced protection and **controlled access** in all circumstances. Designed to hold hazardous or toxic contents, it improves staff and patient **safety** while ensuring reliable organization that complies with hospital requirements.

Box	Vegetable fibers
Handles	PA6 with glass fibers
Wheels	Thermoplastic rubber, grey non-marking
Internal runner walls / Slides	PA6 with glass fibers

BASE

Type of footing	6 swivel wheels with 2 braked at the front
Wheels diameter	125 mm

TYPE OF ATTACHMENT

Internal runner walls / Slides	Removable slide without tools

SAFETY CHARGE

Maximum admissible load	250 kg

CONFIGURATION

Configuration	2 guide handle on each side

COLORS

Box	Quartz

CAPACITY

Slides number (G height)	2 x 15G
Typ of springers	Sliders
Sliders: Drawer height 75 mm	30
Sliders: ABS tray height 50 mm	40
Sliders: Shelf for Daily pillboxes medium model height 50 mm	42

FIRE CLASSIFICATION

Plastic	M2
Vegetable fibers	D-s2d0

Preventive maintenance tailored to your needs

The maintenance of medical devices is not only a **technical obligation**, but also a **legal** and regulatory responsibility of the organisation.

It is based on:

- A clear policy
- Traceability procedures
- The use of compliant parts
- And staff training

The advantages of preventive maintenance

THE BENEFITS OF REGULAR MAINTENANCE OF YOUR EQUIPMENT

- Improved performance: maximum fleet availability.
- Improved quality: a reliable and continuous service.
- Lower costs: reduced repair costs.
- Fewer breakdowns: continuity guaranteed.

EXTEND THE LIFESPAN OF YOUR EQUIPMENT & ENSURE SAFETY

Our maintenance programmes are designed to:
- Ensure your equipment performs to its full potential.
- Provide regular checks and reliable diagnostics.
- Safeguard the safety of patients, residents and carers.
- Maintain your organisation’s regulatory compliance.

A BUDGET UNDER CONTROL

Our maintenance solutions help you to:
- Plan your expenditure.
- Avoid unexpected costs.
- Optimise your investments with complete transparency.

CERTIFIED COMPONENTS FOR SUSTAINABLE VIABILITY

All our services are carried out using original parts that have been tested and approved, guaranteeing:
- Maximum safety when using your equipment.
- Strict compliance with regulatory standards.
- The durability and reliability of your beds, mattresses and accessories.

Our preventive maintenance services

A SINGLE POINT OF CONTACT FOR A COMPREHENSIVE SOLUTION

From pre-sales to after-sales, we support you every step of the way.

Through a **detailed analysis** of your needs, we provide **tailored technical support**, based on a **long-term** and **effective** partnership.

EXPERTS AT YOUR SIDE

Our technicians and engineers, who receive regular training in the latest innovations, guarantee you:
- A responsive, high-quality service.
- Professional installation of your equipment.
- Comprehensive training for your teams, delivered directly on-site.

OUR TECHNICIANS CARRY OUT A FULL INSPECTION

- Mechanical inspection: assembly, joints, brakes, locking mechanisms.
- Electrical inspection: components, controls, sensors.
- Safety features: barriers, locking systems, protective devices.
- Lubrication: re-greasing of all pivot points.
- Electrical tests: carried out in accordance with current standards.

Each operation (inspection, adjustment, replacement) is recorded in the technician’s maintenance report.

RENOVATION OF THE PARK

Following the visit, our preventive maintenance team will email you the **maintenance report** completed for each piece of equipment.
The **service reports** are sent to your HAcare contact, who will draw up the necessary quotes for repairs or replacements.

This provides you with **comprehensive** and **transparent** tracking of the **maintenance** of your equipment fleet.

The result: a clear and traceable process that guarantees the safety, compliance and availability of your equipment. Translated with DeepL.com (free version)
