HAcare, specialist in medical devices since 1860.

At HAcare, we design, manufacture and distribute medical devices and innovative, durable medical furniture solutions designed to improve the daily lives of patients and healthcare professionals alike.

The HAcare Group's eco-responsible commitments

The HAcare group commits to an **eco-responsible industrial orientation**

In its sustainable development strategy, the HAcare group has defined a list of **6 commitments** that guide its **actions and decisions** since the group's creation and for the years to come.

Indicators have been set up for each commitment.

Our 6 commitments

- Made in France production
- The use of renewable resources
- Integrating the circular economy into all new product developments
- Responsible purchasing (supplier quality monitoring)
- Daily actions to respect and protect the environment
- Combating RSI and noise pollution through our products

Choose the circular economy

HAcare finished products can be recycled through a recovery circuit at the end customer's premises, for recycling with our partner supplier. As wood cannot be recycled ad infinitum because its fibers become too small or exhausted, wood waste is recovered and transformed into green energy.

The plant fiber boards used in the manufacture of HAcare products are 100% reclaimed wood. Each HAcare finished product bears an index revealing the proportion of plant fiber contained.

Recycling is the practice of recovering used materials from the waste stream, then incorporating these same materials into the manufacturing process. Each HAcare finished product carries an index revealing the proportion of recycled material it contains.

Recyclable materials

HAcare finished products are 95% recyclable. For example, the HAcare medical bed is entirely recyclable, except for the wheels and motors. Each bed can be dismantled to recover each material separately: plant fiber, metal, plastic.

PLANT FIBER

Recycled wood

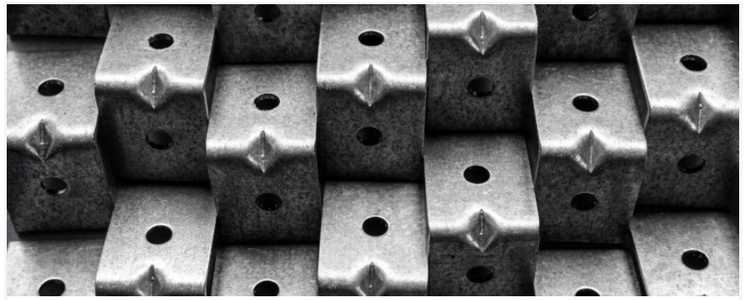

The plant fiber boards used in the manufacture of HAcare Group products are:

100% reused wood

Reuse is one of the environmentally friendly processes. It involves, for example, leftovers from wood-processing companies (e.g. sawmill scraps, production offcuts...). But also by-products from activities such as sustainable forest management and slope maintenance.

100% FSC-certified wood

Recyclable with a partner supplier who, on a worldwide exclusive basis and since 2021, recycles MDF and HDF panels.No water consumption, nor green energy **biomass**.

The metal

All metal components are **recyclable** and reusable, **infinitely**. Once the metal has been sorted, it is compressed, crushed, rolled and melted. It is then remolded into coils, bars or wire for reuse. This process can be endless!

Metal recycling has **many advantages**. It conserves natural resources by reducing the need for virgin materials, cuts energy consumption and reduces **greenhouse gas emissions**.

Recycled plastic

At recycling plants, waste (re) becomes a **raw material** through various processes: grinding, micronization, regeneration of plastics.

The recycled plastic will then be resold to **plasturgy** manufacturers in the form of **flakes**, powder or even **granules**.

EMERGENCY CARTS HOSPITAL

Technical platform

Secure trolley with joint drawers - MM3 (MOD'ALLI)

OUR EXCLUSIVES

OUR EXCLUSIVES

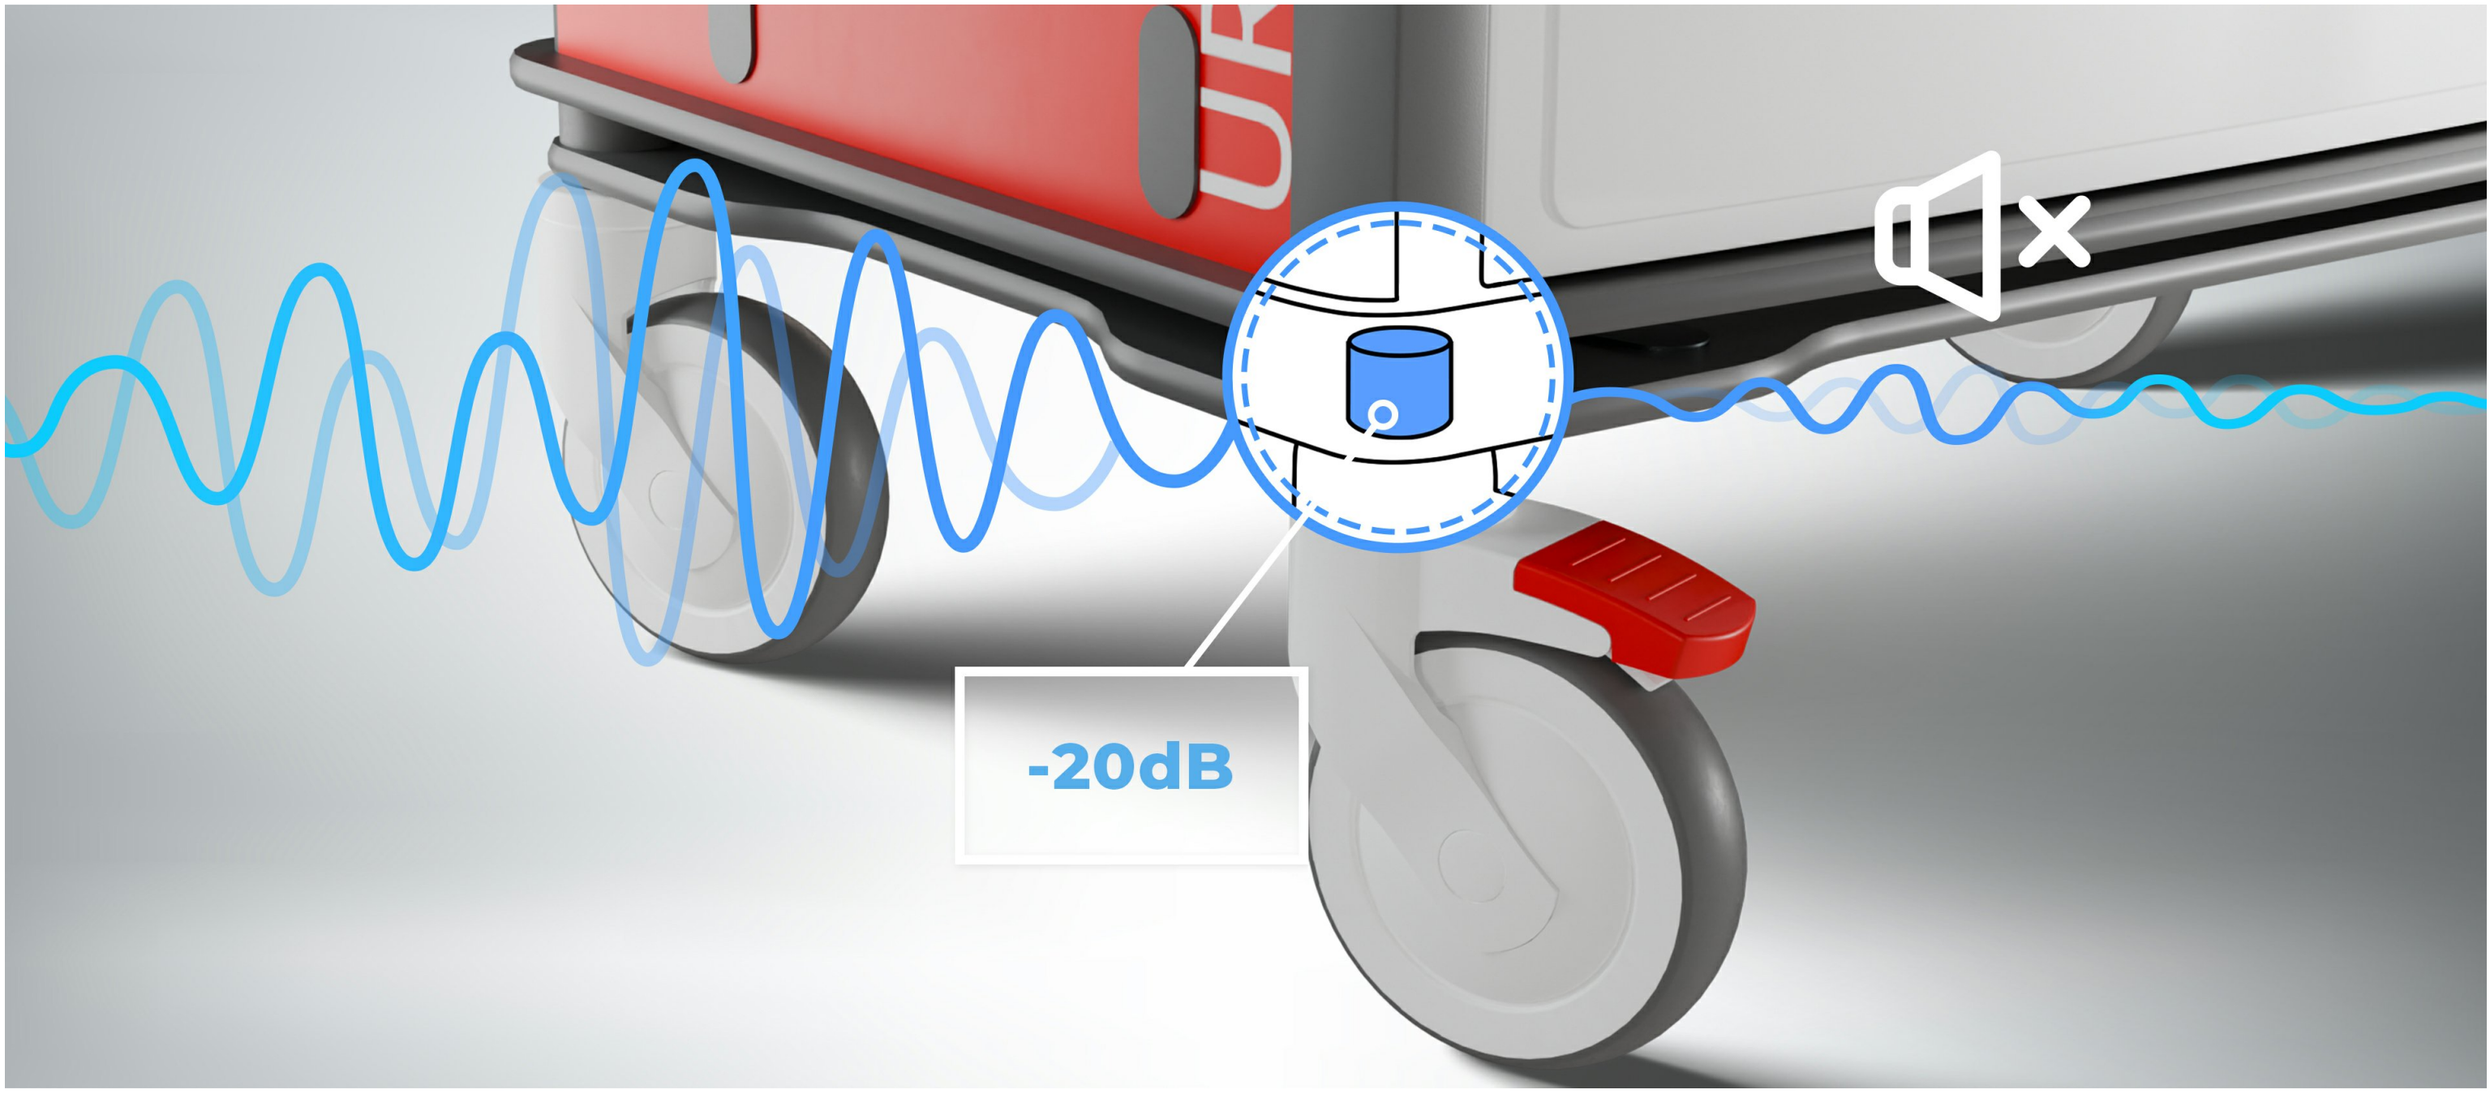

Soft Sound

Over the past 40 years, the average noise level in hospitals has increased by 15 decibels (dB), reaching levels of around 70 dB, well above the WHO recommended limit of 35 dB for a healthcare environment. HAcare products are designed to combat noise pollution. The goal is to reduce noise by 20 dB by adding shock absorbers to all rolling and stretcher-mounted structures.

SOFT SOUND®

Combating noise pollution

Anti-vibration support, high-performance **shock absorber**: for smooth, **quiet**, and comfortable **movement**, even when crossing thresholds or exiting elevators.
Noise pollution is significantly **reduced**.

OUR EXCLUSIVES

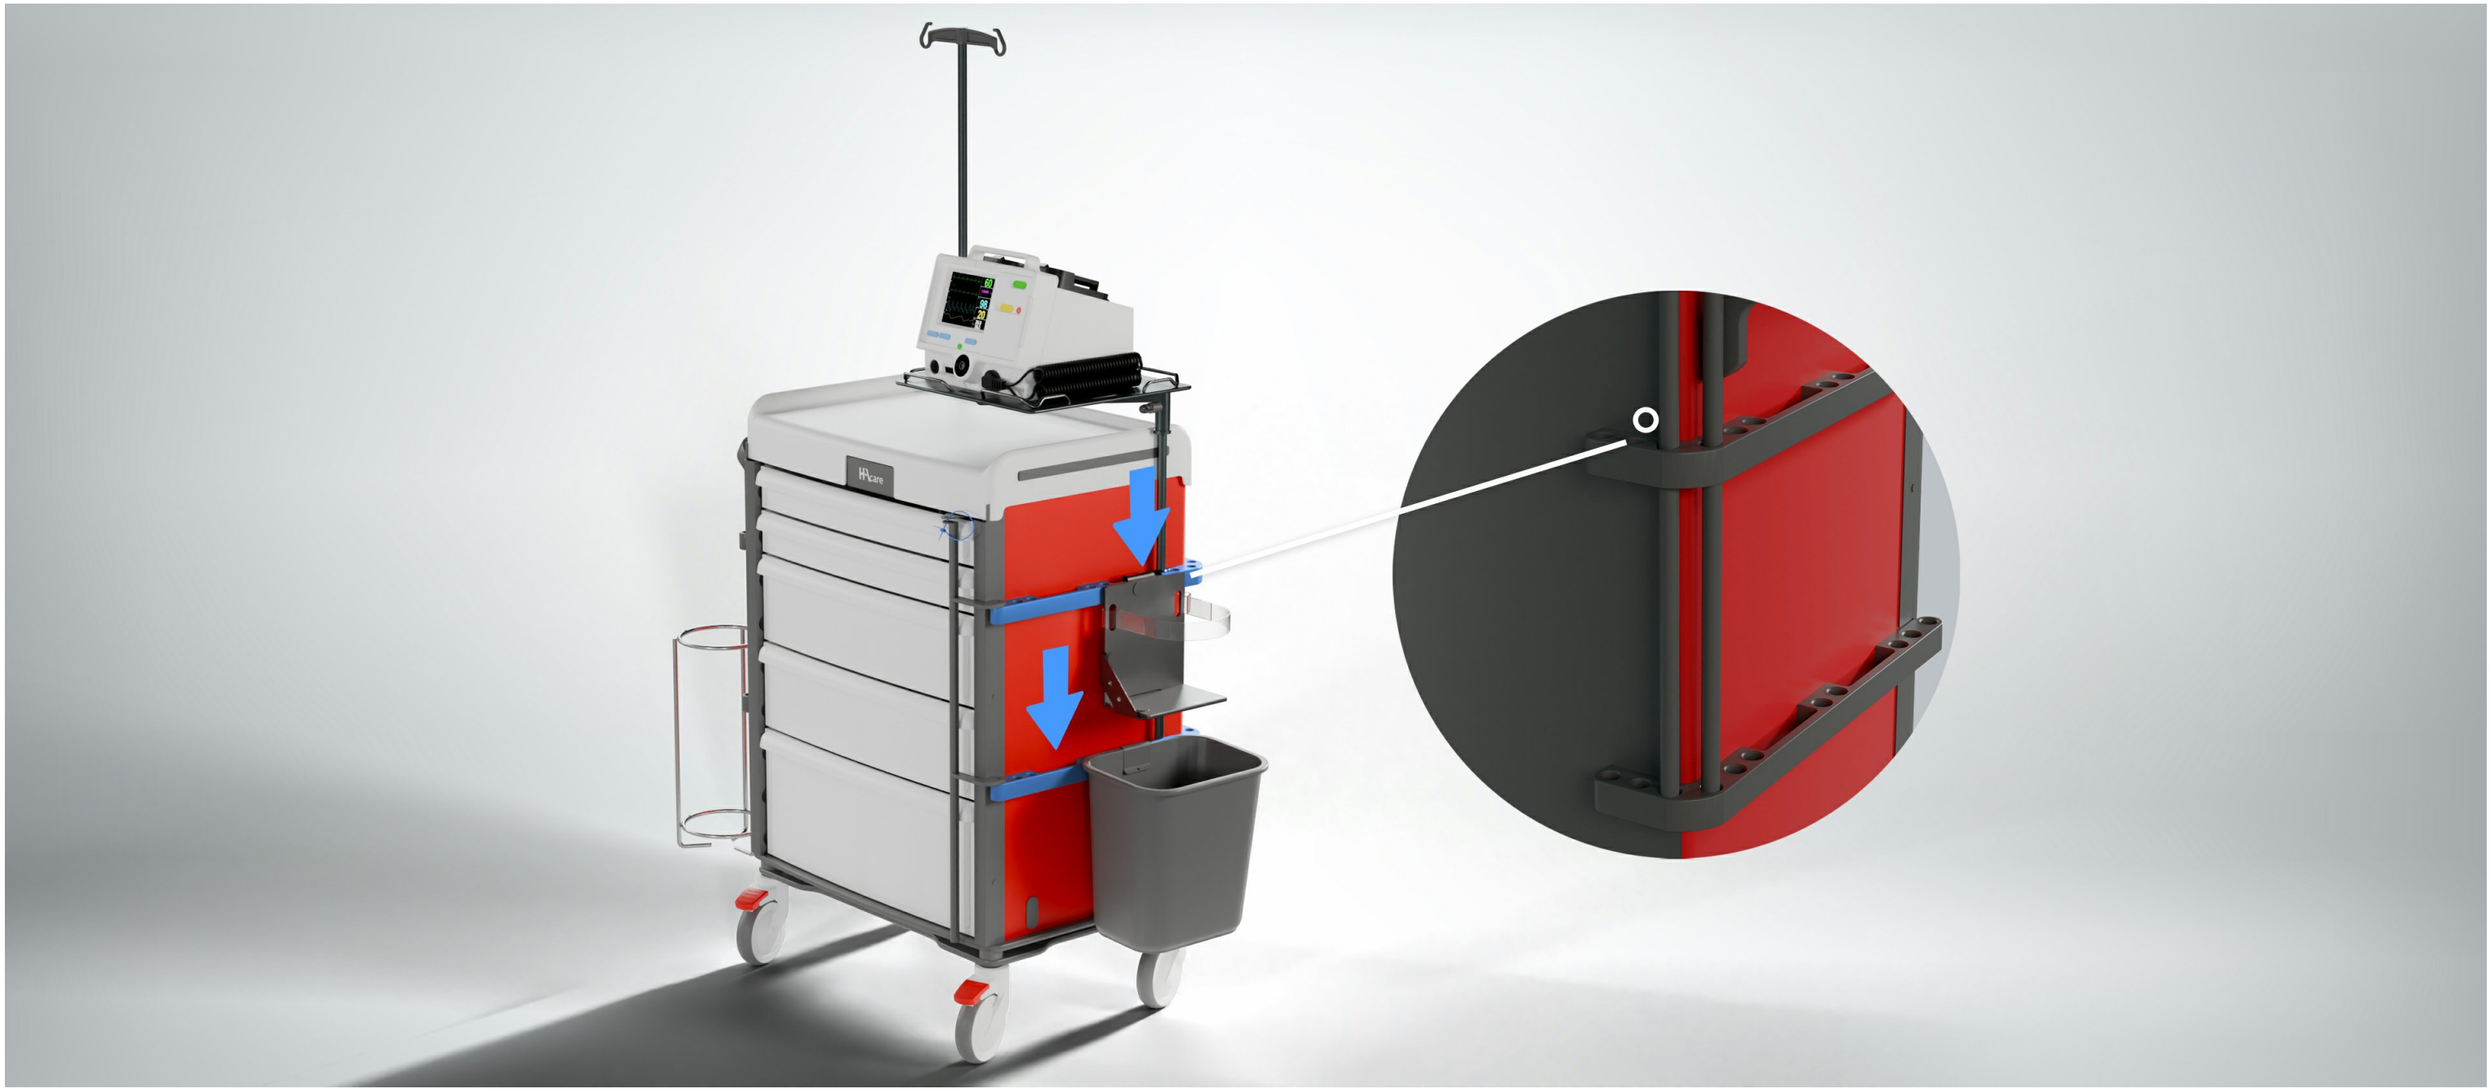

Easy Clip

In a healthcare environment where every second counts and space is often limited, optimizing the treatment area becomes a strategic issue for improving the efficiency of healthcare teams and patient safety.

The EasyClip® concept was designed to address these constraints with an approach that is ergonomic, intuitive, and modular.

Optimize the treatment area

The accessories can be **attached** in a single step, **without any tools**, providing immediate time saving.
The **accessories** are fully **modular** and adapt to every need and every care situation, for **smoother** and **more efficient work** on a daily basis.

OUR EXCLUSIVES

Scellé numéroté

Enhanced security and traceability

The **numbered seal protects the contents** of the emergency cart and ensures **complete traceability**. Each **opening** is **monitored**, guaranteeing security, **integrity of the equipment**, and **compliance** with protocols during interventions.

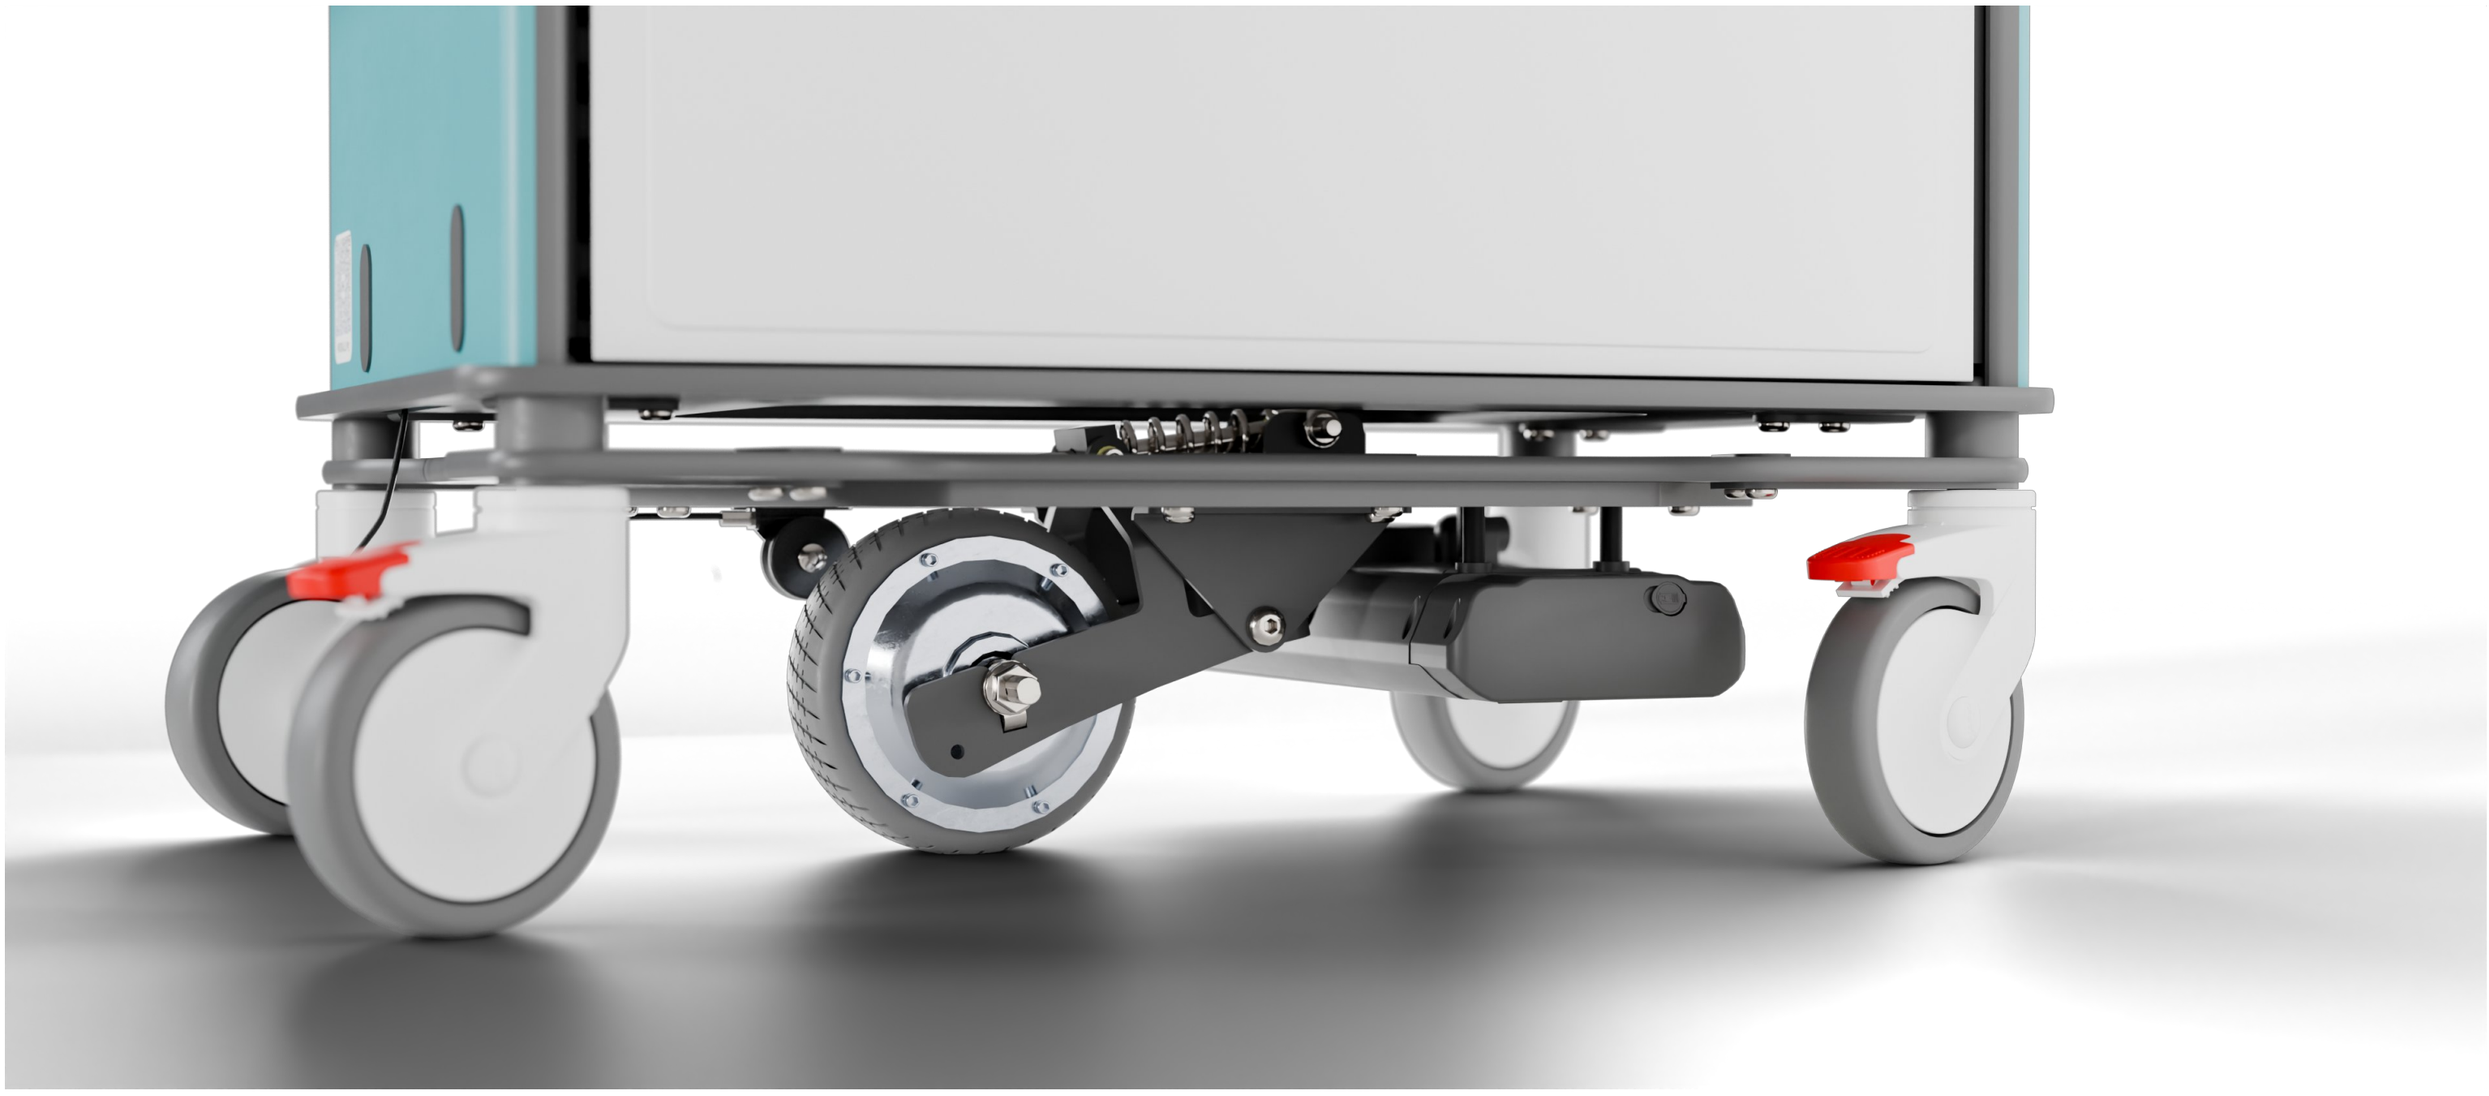

OUR EXCLUSIVES

EasyMov and the motorized fifth wheel

In a hospital environment under constant strain, handling heavy loads and moving stretchers present daily challenges for medical teams. Between overcrowded wards and narrow hallways, the risks of musculoskeletal disorders (MSDs) for staff and discomfort for patients are heightened. It was to address these challenges related to workplace health and the quality of patient care that the assisted transport solution was developed.

Motorization with the 5th wheel

The **motorization**, combined with a **5th swivel wheel,** offers excellent **maneuverability**.
It **makes** getting **around easier** with its **removable**, **lockable battery**, a **20-kilometer range**, and a **forward/reverse throttle** equipped with an **electric brake.**

HIGHLIGHTS

Easy identification (Identification)

Easily identifiable by its **color** and **markings**, the emergency cart enables **rapid** and effective **intervention** in the event of life-threatening emergencies. Designed to **optimize access** to essential **equipment** and **medications**, it ensures maximum responsiveness by healthcare personnel. Available in **three versions**, it can be **standardized** for universal use or **customized** according to the specific needs of each department.

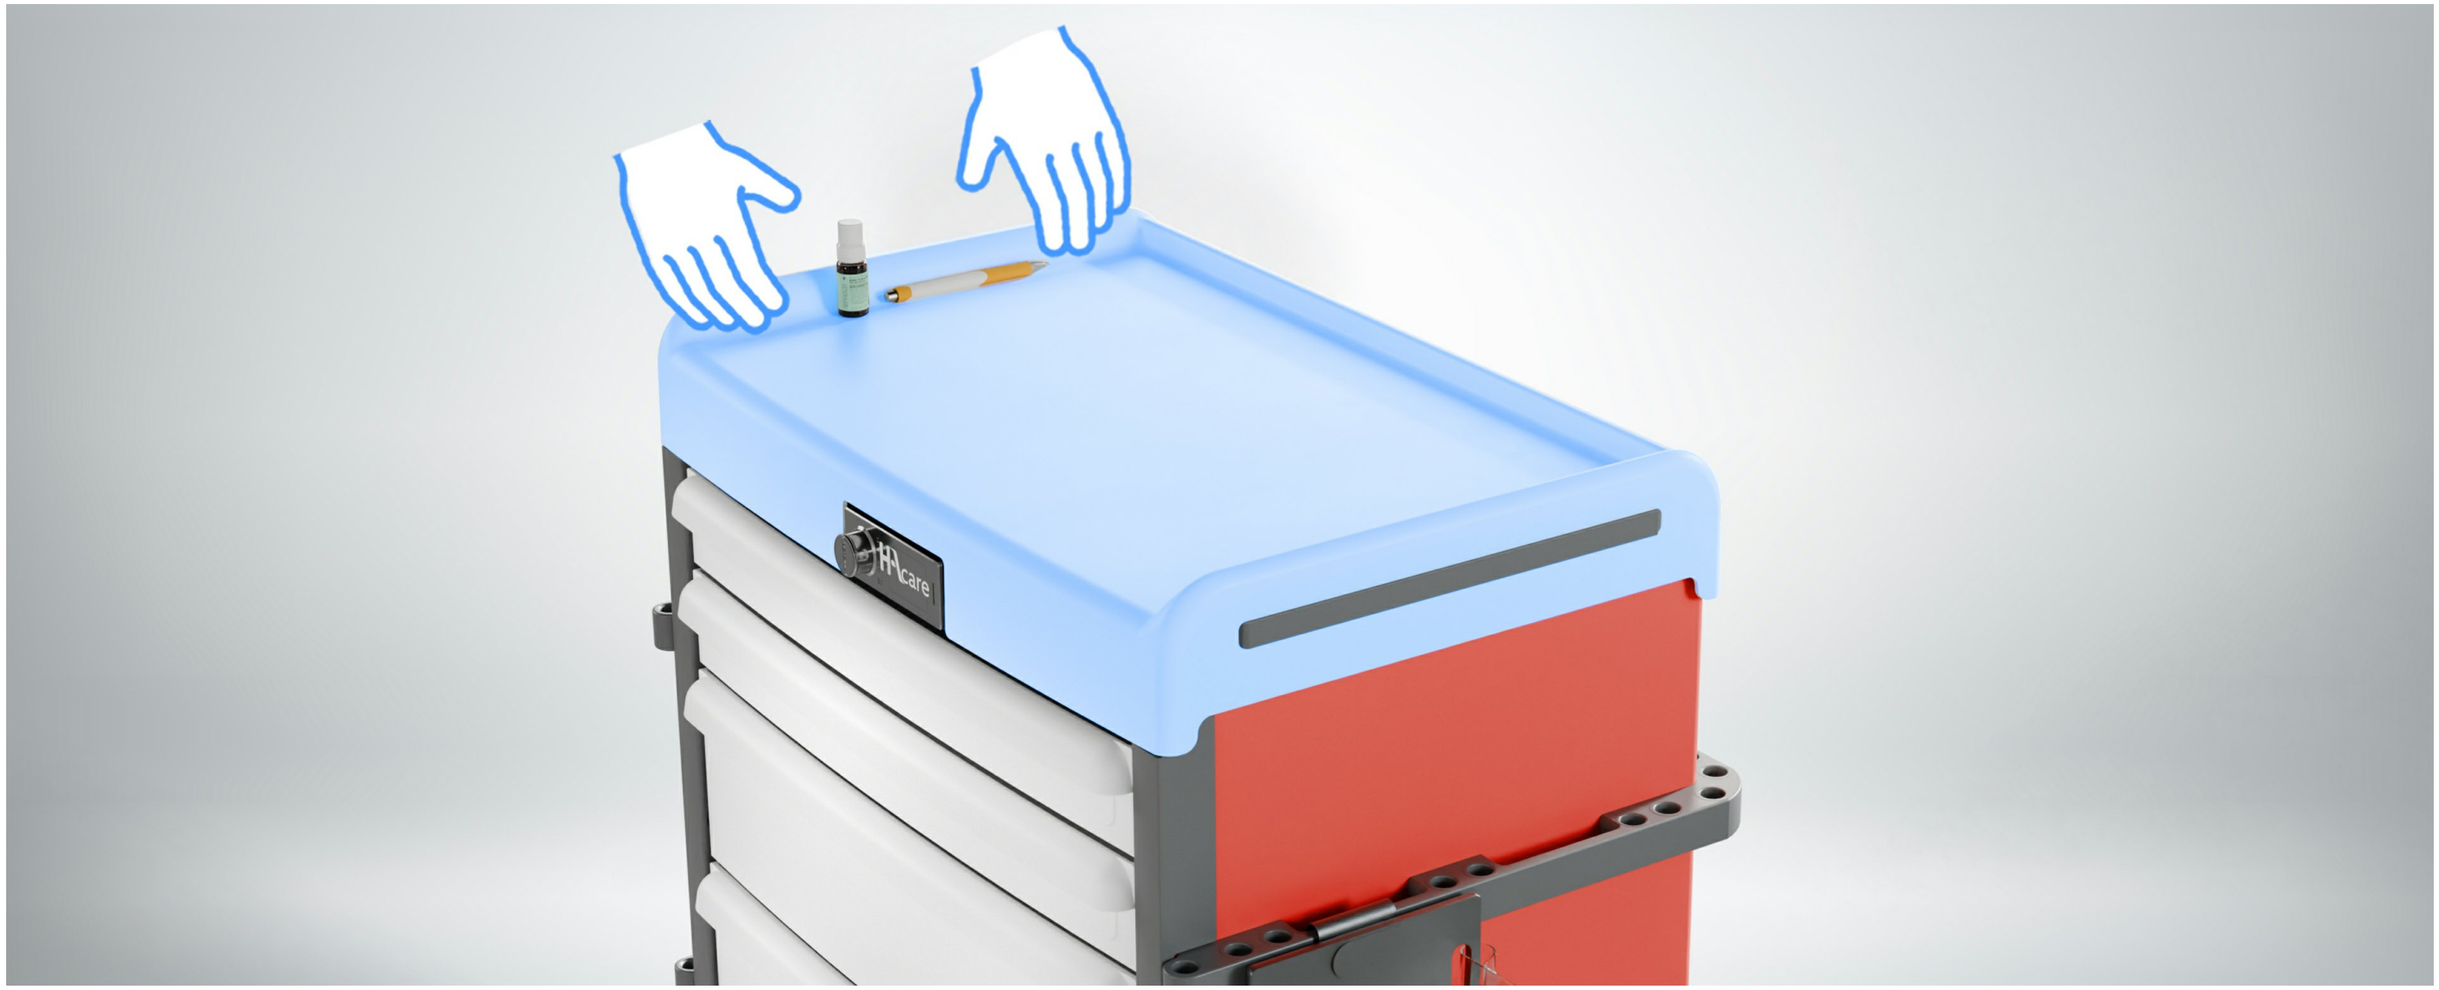

Modularity designed for emergency situations (Configurable)

The medical furniture offers **great modularity** for optimized storage: **small drawers** for small medical supplies (syringes, needles, etc.), **medium drawers** for compresses and infusion sets, and a **large drawer** for large solution bottles, the cardiac massage **board**, **IV pole**, **monitoring support**, and **oxygen cylinder**. The **sliding shelf,** which is mainly used for administrative tasks**, increases** the **work surface** and frees up space for preparation.

HIGHLIGHTS

Secure tray for reliable preparation (Work surface)

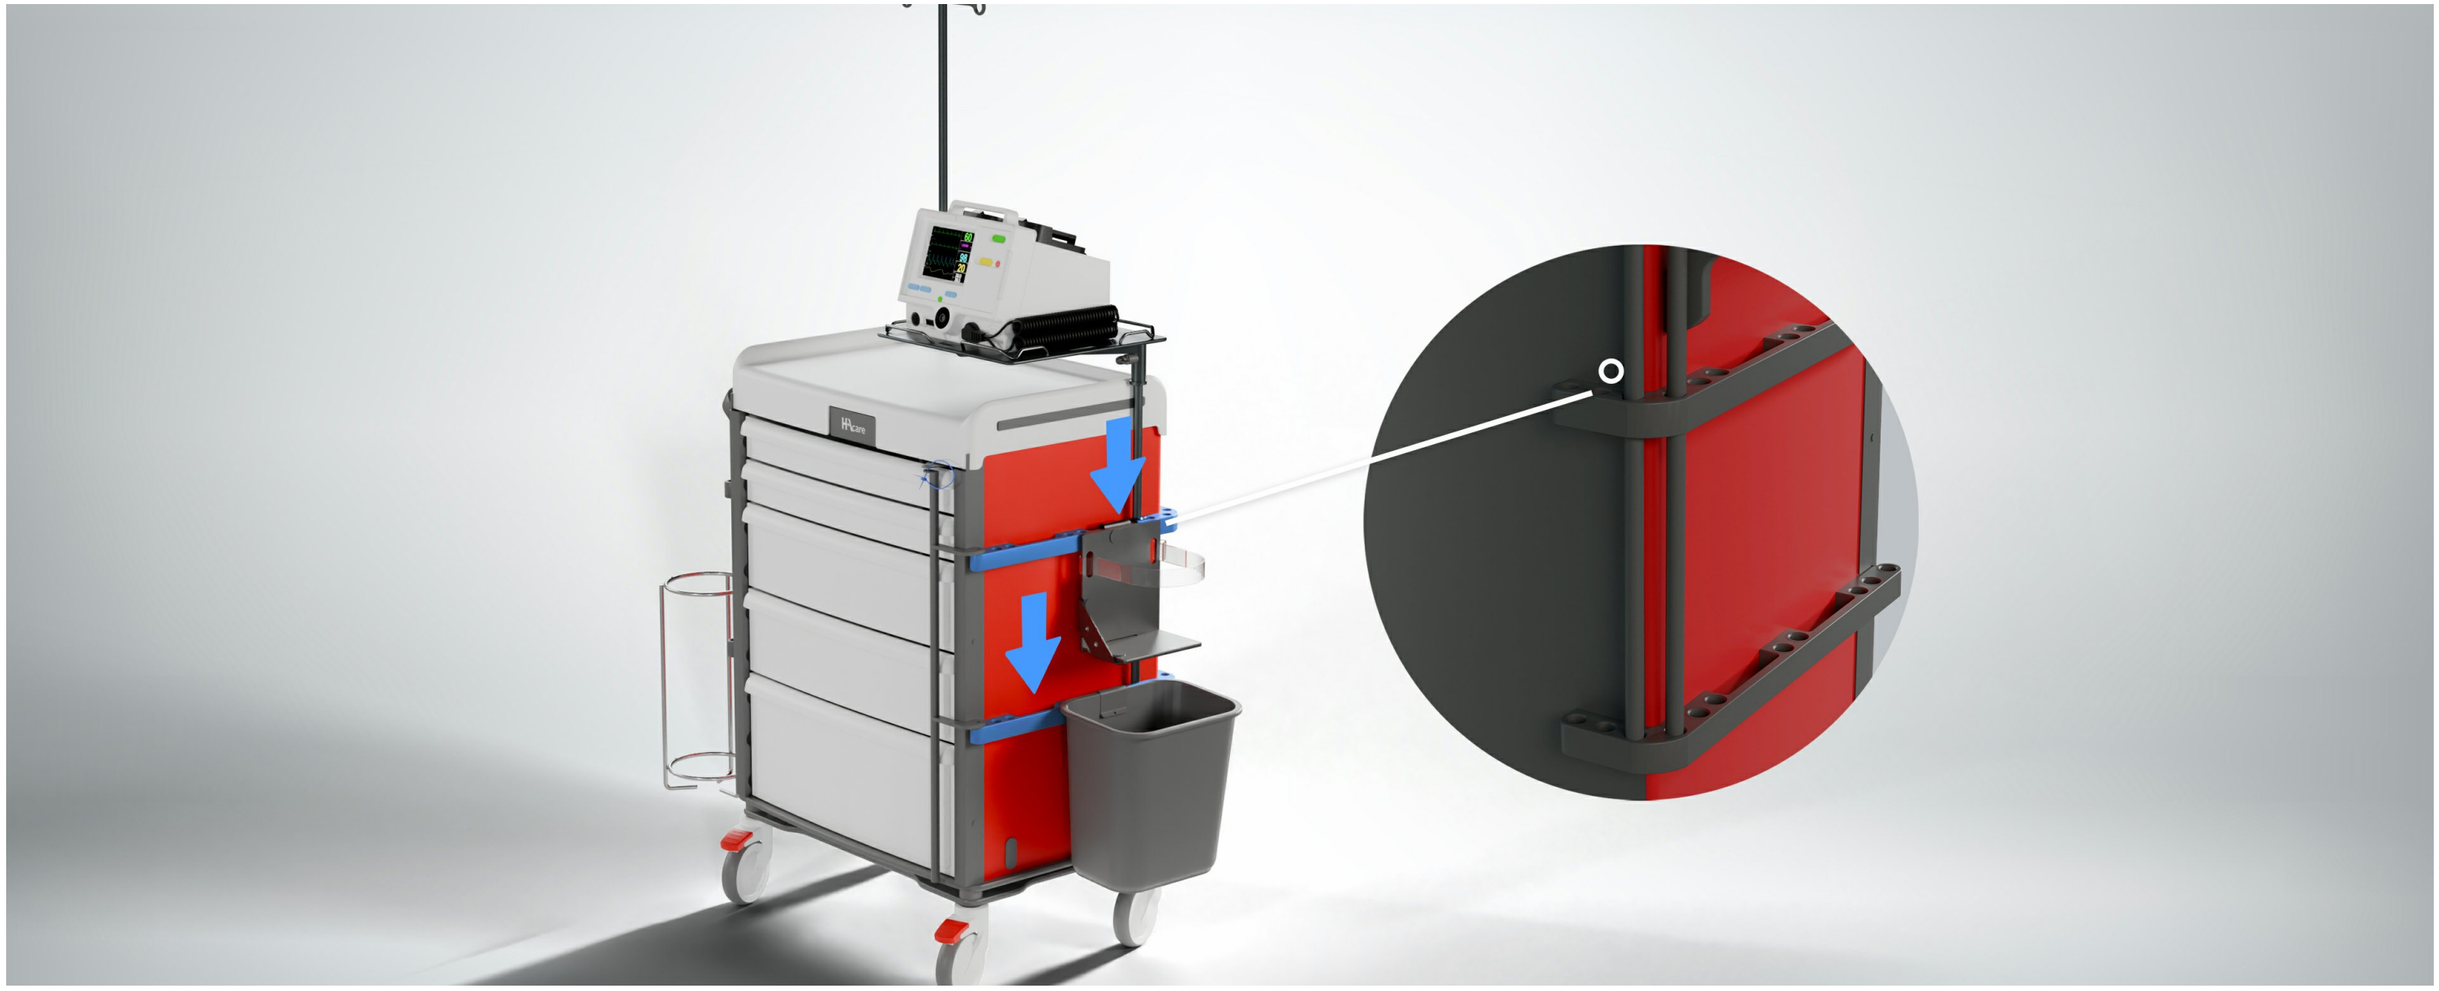

The medical furniture **tray** is designed with a **rim on three sides** to ensure **optimal safety** during treatment preparation. This design **prevents instruments** or **products from falling**, even when moving. Practical and ergonomic, it allows healthcare staff to work with confidence, with a **stable**, secure, and **easy-to-maintain workspace**. A design that combines safety, ease of use, and everyday efficiency.

Extendable shelf (Optimizing space)

The **sliding shelf** provides a practical **extension** of the **work surface**, ideal for optimizing space during treatment. Combined with peripheral Accessories, it **secures bottles** and **equipment** while keeping the main tray clear. The first drawer, dedicated to the keyboard and mouse, frees up even more preparation space. An STPO slot completes the set for ergonomic, fluid organization that is perfectly suited to demanding medical environments.

Accessory rail (Easy Clip)

EASY CLIP

Choose your accessories based on the uses and needs of your department. Our **Easy Clip** concept allows for **easy installation** and **reorganization** on rails, **without any tools.** This allows you to gain efficiency and flexibility.

Easy CLEAN (Easy CLEAN)

EASY CLEAN

Easy CLEAN

CHARACTERISTICS

CHARACTERISTICS

Mobility

EasyMOV

Designed to combine ease of use and performance, our medical furniture offers **optimal maneuverability** thanks to its **integrated** shock **absorber** system. This technology **absorbs vibrations** and unevenness in the floor, ensuring smooth, **safe**, and **effortless movement**, even in demanding hospital environments.

The push handle makes it easy **to grip**.

Every movement is made easier, reducing fatigue and protecting the health of users on a daily basis.

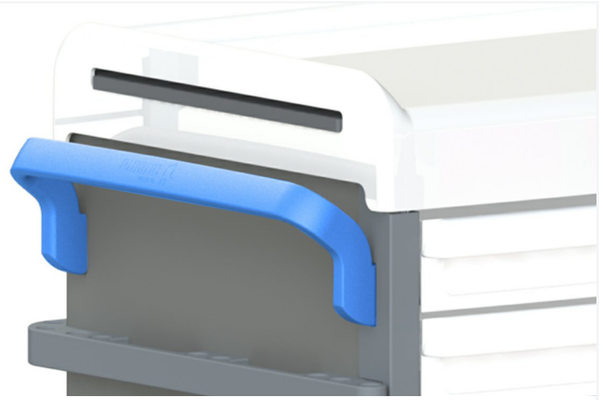

Designed to **limit musculoskeletal disorders** (MSDs), it allows caregivers to work in better ergonomic conditions, while ensuring the safety and stability of the equipment being transported.

Choice of casters

The medical furniture adapts to any environment thanks to **a choice of** 75 mm or 125 mm **casters**, allowing for **optimal** adjustment of the work **surface height** and **ease of movement**.

The **two front brakes**, easily accessible by foot, ensure **perfect stability** during care or preparation, reinforcing the **safety** of the furniture and the confidence of caregivers in their actions.

Push handles

Designed to combine ease of use and performance, our medical furniture offers **optimal maneuverability** and a **good grip** thanks to its **push handle**.

Its integrated shock absorber system makes it easy to move around.

Every **movement** is **smooth**, reducing fatigue and protecting the health of users on a daily basis.

Designed to **limit musculoskeletal disorders** (MSDs), it allows caregivers to work in better ergonomic conditions, while ensuring the safety and stability of the equipment being transported.

CHARACTERISTICS

Configurable

Optimize space

HACARE medical furniture adapts to every use thanks to a **wide range** of **modular components**. The P80 version optimizes care and offers **ample** storage **capacity**. **Compatible** with **standard drawers** and **lip trays**, it allows for clear and efficient organization. Ideal for **combining** adjoining drawers and standard shelves, it provides a **practical**, scalable, and efficient **workspace** for everyday use, meeting the needs of healthcare teams.

Basic equipment

The emergency trolley is equipped with a **numbered seal closure**, ensuring complete traceability of its use. It has **five functional drawers**: **two small** ones for injectables, **two medium ones** for DMS, a n d **one large drawer** dedicated to solutions. A **clear** and optimized **layout** for **quick**, secure, and efficient **access** in critical situations, allowing healthcare staff **to respond quickly** and calmly.

Intermediate equipment

The emergency cart can be **locked** with **a numbered seal**, ensuring **complete traceability** of its use. **In addition to the basic equipment**, it includes a **cardiac massage board,** an **IV pole**, and a **monitoring support**, offering a complete solution for **rapid** and effective **intervention** in critical situations. Its layout optimizes access to essential tools, ensuring **safety**, **responsiveness**, and **peace of mind** for healthcare personnel.

Complete equipment

The emergency trolley can be **locked with a numbered seal**, ensuring **complete traceability** of its use. **In addition to the basic equipment**, it includes a **cardiac massage board**, an **IV pole**, a **monitoring support**, and **an oxygen bottle holder**, offering a complete solution for **rapid** and effective **intervention**. Its layout optimizes access to essential tools, ensuring **safety**, **responsiveness**, and **peace of mind** for healthcare personnel.

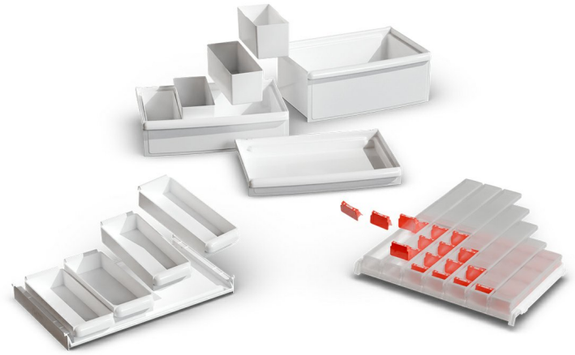

CHARACTERISTICS

Configurable

Modularity according to use

The medical furniture offers **great modularity** for optimized storage: **small drawers** for small medical supplies (syringes, needles, etc.), **medium drawers** for compresses and infusion sets, and a **large drawer** for large-volume solutions. The **sliding shelf,** which is mainly used for administrative tasks, increases the work surface area and frees up space for preparation. A dedicated space for **IT equipment** optimizes and facilitates patient monitoring.

Choosing components for custom medical furniture

Configure your medical furniture according to your **needs** with a wide range of **modular components**. Create a **tailor-made solution that** is perfectly suited to your everyday use. Each element is designed to **optimize** your organization, your working **comfort**, and the **efficiency** of care, while ensuring optimal ergonomics. Complete customization for **furniture** that **is scalable, durable**, and perfectly suited to the requirements of your department.

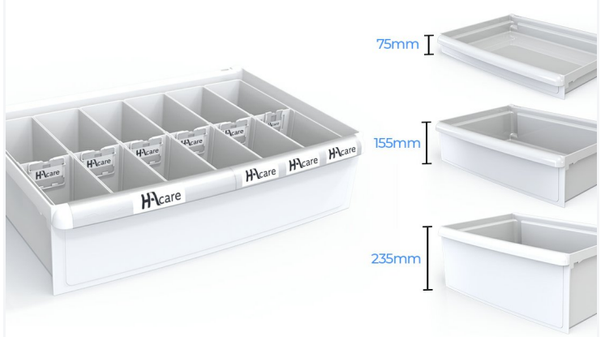

Selecting type configurations

Thanks to **our expertise** in medical furniture, we design **"type" configurations** for every use. Careful selection of **components** and **Accessories**, optimized layout, ergonomics, and ease of use: everything is designed to meet the specific needs of each department. **Our team will help you** define the configuration best suited to your practices, combining functionality, durability, and everyday efficiency.

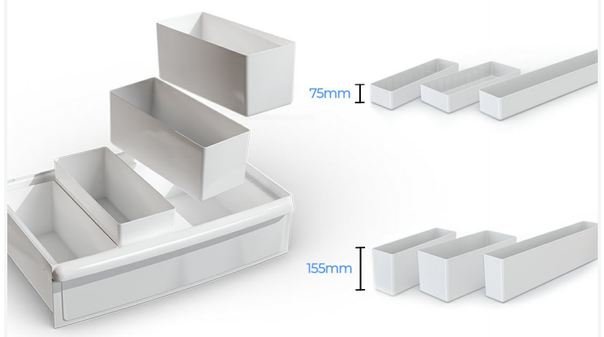

The **adjoining drawers protect** the contents of the drawers **from** prying **eyes**, **light**, and **UV** rays, thus preserving the quality and **confidentiality** of the stored products.

Thanks to the **centralized locking** system, opening and closing can be done in **a single step**, simplifying the work of staff while enhancing security.
The **removable drawers** can be **cleaned in an autoclave**, and the **rounded corners** make cleaning easier.
A practical and reliable solution that combines protection, efficiency, and peace of mind on a daily basis.

Ergonomic drawers

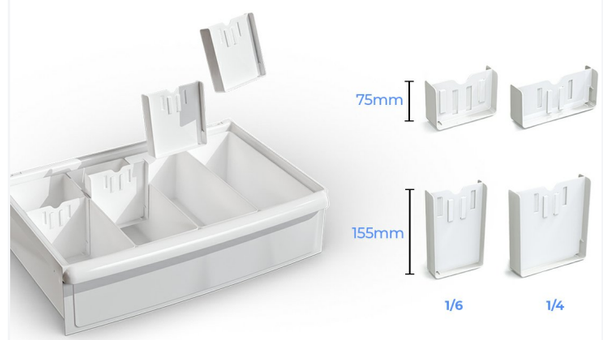

The medical furniture **adapts** to any healthcare organization thanks to its **customizable configurations**. Choose from three drawer heights and **freely configure** the interior layout to suit your needs.

Separation bins

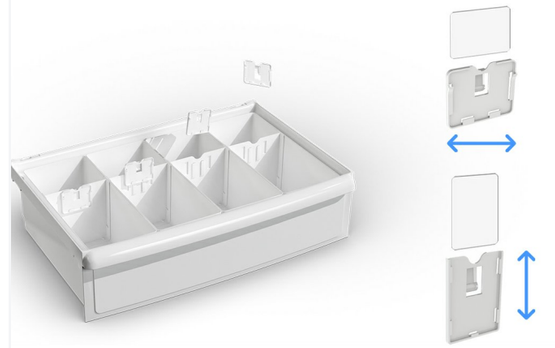

The medical furniture adapts to **any** healthcare **organization** thanks to its **customizable configurations.** Choose from three drawer heights and freely arrange the **interior layout** according to your needs with the **divider trays.**

A **flexible** and **scalable** design that **optimizes space,** improves ergonomics, and makes each care station more functional on a daily basis.

Separators

Freely **customize** the **interior layout** to suit your needs with dividers, **separators**, and subdivision boxes that isolate each care item for **greater safety**. A **flexible** and **scalable design** that **optimizes space**, improves ergonomics, and makes each care station more functional on a daily basis.

Label holders and labels

Label holders on medical furniture drawers facilitate **quick** and accurate **identification** of contents, **reducing errors** and optimizing **healthcare organization**. They enable **clear identification** of medications, medical devices, or supplies, thereby improving team **productivity** and **workflow**. Adaptable and **modular**, they contribute to a structured and **secure** care environment, while **simplifying** the **daily management** of equipment and enhancing the efficiency and safety of interventions.

Preventive maintenance tailored to your needs

The maintenance of medical devices is not only a **technical obligation**, but also a **legal** and regulatory responsibility of the organisation.

It is based on:

- A clear policy
- Traceability procedures
- The use of compliant parts
- And staff training

The advantages of preventive maintenance

THE BENEFITS OF REGULAR MAINTENANCE OF YOUR EQUIPMENT

- Improved performance: maximum fleet availability.
- Improved quality: a reliable and continuous service.
- Lower costs: reduced repair costs.
- Fewer breakdowns: continuity guaranteed.

EXTEND THE LIFESPAN OF YOUR EQUIPMENT & ENSURE SAFETY

Our maintenance programmes are designed to:
- Ensure your equipment performs to its full potential.
- Provide regular checks and reliable diagnostics.
- Safeguard the safety of patients, residents and carers.
- Maintain your organisation’s regulatory compliance.

A BUDGET UNDER CONTROL

Our maintenance solutions help you to:
- Plan your expenditure.
- Avoid unexpected costs.
- Optimise your investments with complete transparency.

CERTIFIED COMPONENTS FOR SUSTAINABLE VIABILITY

All our services are carried out using original parts that have been tested and approved, guaranteeing:
- Maximum safety when using your equipment.
- Strict compliance with regulatory standards.
- The durability and reliability of your beds, mattresses and accessories.

Our preventive maintenance services

A SINGLE POINT OF CONTACT FOR A COMPREHENSIVE SOLUTION

From pre-sales to after-sales, we support you every step of the way.

Through a **detailed analysis** of your needs, we provide **tailored technical support**, based on a **long-term** and **effective** partnership.

EXPERTS AT YOUR SIDE

Our technicians and engineers, who receive regular training in the latest innovations, guarantee you:
- A responsive, high-quality service.
- Professional installation of your equipment.
- Comprehensive training for your teams, delivered directly on-site.

OUR TECHNICIANS CARRY OUT A FULL INSPECTION

- Mechanical inspection: assembly, joints, brakes, locking mechanisms.
- Electrical inspection: components, controls, sensors.
- Safety features: barriers, locking systems, protective devices.
- Lubrication: re-greasing of all pivot points.
- Electrical tests: carried out in accordance with current standards.

Each operation (inspection, adjustment, replacement) is recorded in the technician’s maintenance report.

RENOVATION OF THE PARK

Following the visit, our preventive maintenance team will email you the **maintenance report** completed for each piece of equipment.
The **service reports** are sent to your HAcare contact, who will draw up the necessary quotes for repairs or replacements.

This provides you with **comprehensive** and **transparent** tracking of the **maintenance** of your equipment fleet.

The result: a clear and traceable process that guarantees the safety, compliance and availability of your equipment. Translated with DeepL.com (free version)
