Our preventive maintenance services 79

HAcare, specialist in medical devices since 1860.

At HAcare, we design, manufacture and distribute medical devices and innovative, durable medical furniture solutions designed to improve the daily lives of patients and healthcare professionals alike.

The HAcare Group's eco-responsible commitments

The HAcare group commits to an **eco-responsible industrial orientation**

In its sustainable development strategy, the HAcare group has defined a list of **6 commitments** that guide its **actions and decisions** since the group's creation and for the years to come.

Indicators have been set up for each commitment.

Our 6 commitments

- Made in France production
- The use of renewable resources
- Integrating the circular economy into all new product developments
- Responsible purchasing (supplier quality monitoring)
- Daily actions to respect and protect the environment
- Combating RSI and noise pollution through our products

Choose the circular economy

HAcare finished products can be recycled through a recovery circuit at the end customer's premises, for recycling with our partner supplier. As wood cannot be recycled ad infinitum because its fibers become too small or exhausted, wood waste is recovered and transformed into green energy.

The plant fiber boards used in the manufacture of HAcare products are 100% reclaimed wood. Each HAcare finished product bears an index revealing the proportion of plant fiber contained.

Recycling is the practice of recovering used materials from the waste stream, then incorporating these same materials into the manufacturing process. Each HAcare finished product carries an index revealing the proportion of recycled material it contains.

Recyclable materials

HAcare finished products are 95% recyclable. For example, the HAcare medical bed is entirely recyclable, except for the wheels and motors. Each bed can be dismantled to recover each material separately: plant fiber, metal, plastic.

PLANT FIBER

Recycled wood

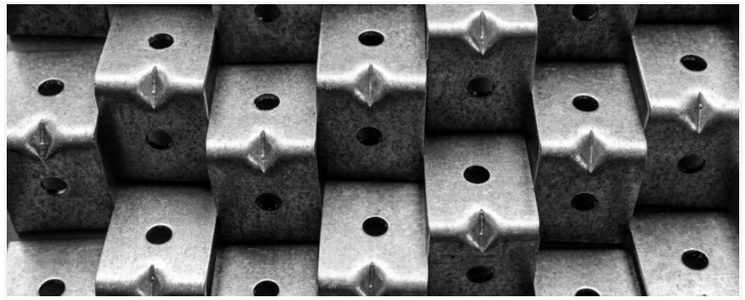

The plant fiber boards used in the manufacture of HAcare Group products are:

100% reused wood

Reuse is one of the environmentally friendly processes. It involves, for example, leftovers from wood-processing companies (e.g. sawmill scraps, production offcuts...). But also by-products from activities such as sustainable forest management and slope maintenance.

100% FSC-certified wood

Recyclable with a partner supplier who, on a worldwide exclusive basis and since 2021, recycles MDF and HDF panels.No water consumption, nor green energy **biomass**.

The metal

All metal components are **recyclable** and reusable, **infinitely**. Once the metal has been sorted, it is compressed, crushed, rolled and melted. It is then remolded into coils, bars or wire for reuse. This process can be endless!

Metal recycling has **many advantages**. It conserves natural resources by reducing the need for virgin materials, cuts energy consumption and reduces **greenhouse gas emissions**.

Recycled plastic

At recycling plants, waste (re) becomes a **raw material** through various processes: grinding, micronization, regeneration of plastics.

The recycled plastic will then be resold to **plasturgy** manufacturers in the form of **flakes**, powder or even **granules**.

OUR EXCLUSIVES

OUR EXCLUSIVES

P20

In hospital environments, optimizing floor space is a major challenge. Teams have to manage a large volume of medical devices in often restricted premises, while maintaining a fluid, intuitive organization that complies with hygiene requirements. Storage solutions must therefore be compact, modular and allow rapid access to the products needed during care.

Optimize storage with the P20 concept

This mobile storage cabinet guarantees filling without loss of storage space thanks to the concept P20. Furthermore, the 400 Facade allows you to optimize your layout in reduced spaces.

HIGHLIGHTS

Optimizing storage (P20)

HACARE medical furniture adapts to every use thanks to a wide choiceof modularcomponents. It optimizes storage by verticalization with the P20 concept, offering large capacity for storage. Depending on your organization, the cabinets prioritize either component capacity, or component quantity. They ensure a practical, scalable and performing storage space on a daily basis, meeting the needs of care teams.

Designing and optimizing your spaces (Optimizing space)

The 400 or 600 Facades, offered in single or . versions;double, offer modularity ideal for optimizing your storage spaces.They enable you to acurate your layout according to the configuration of each department, even in constrained environments. Thanks to this flexibility, you effectively structure your storage areas, gain accessibility and improve circulation on a daily basis. A solution designed to adjust to all uses.

CHARACTERISTICS

CHARACTERISTICS

Mobility

125 mm castors for easy transfers

The storage cabinet adapts to every environment thanks to the choice of 125 mm, swivel castors, allowing optimization and comfort when moving. The two front brakes, easily accessible by foot, ensure perfect stability when moving, reinforcing the security of the furniture and caregivers' confidence in their movements.

4 adjustable feet for fixed storage

Dedicated to storage, in storerooms, arsenals and PUIs, this fixed cabinet forstorage guarantees refilling without loss of storage space thanks to its 20 pitch. The 400 Facade allows you to optimize your layout in reduced spaces.Structure with steel U-profile Volcanic black epoxy lacquer4 adjustable feet

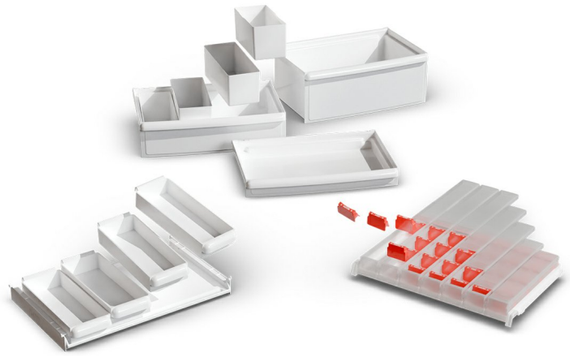

CHARACTERISTICS

Configurable

Modularity for high storage capacity

HACARE modulable furniture enables verticalization of storage and optimization of every square meter, even in constrained spaces. Thanks to the P20 system, teams mix freely trays BJMM/BJGM, three heights of drawers and three heights of lips trays. A flexible, compactorganization.The cladding (optional) allows enclosure of the structure.

Selecting components for customized storage

Configure your medical furniture according to your needs thanks to a wide choice of modular components. Create a tailor-made solution, perfectly adapted to your daily uses. Each element is designed to optimize your organization, your work comfort and the efficiency of your care, while guaranteeing optimal ergonomics. Complete customization for a upgradeable furniture durable and perfectly matched to your department's requirements.

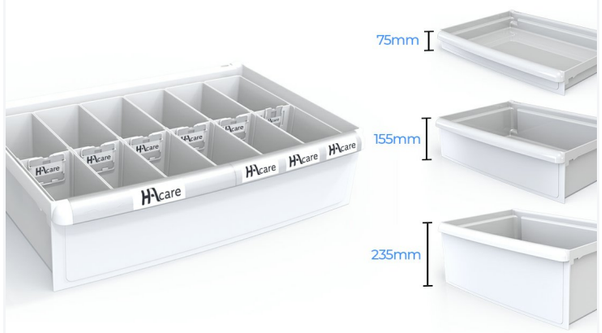

Select "type" configurations

Thanks to our expertise in medical furniture, we design for you "type"configurations thought out for each use. Rigorous selection of components, optimized layout, ergonomics and user comfort: everything is studied to meet the specific needs of each department. Our team will work with you to define the configuration best suited to your practices, combining functionality, durability and day-to-day efficiency.

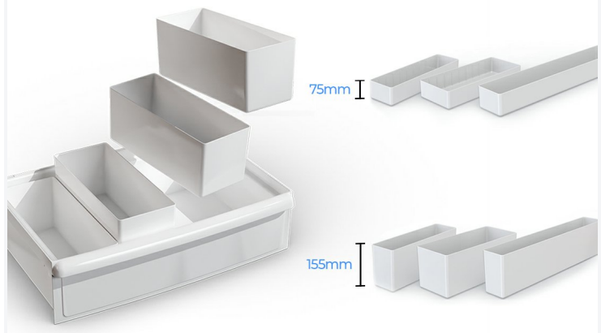

The joined drawers protect the contents of the drawers from prying eyes, light and UVs, preserving the quality and confidentiality of the products stored. Thanks to the central locking system, opening and closing is a one-touch operation, simplifying staff work while enhancing security.The removable drawers can be autoclave-cleaned, the radiated angles make cleaning easier.A practical, reliable solution for combining protection, efficiency and peace of mind on a daily basis.

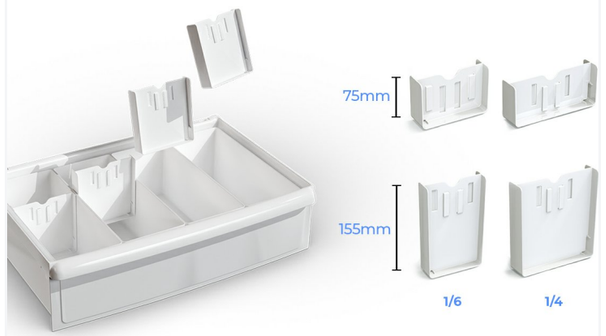

Ergonomic drawers

Medical furniture can be adapted to every care organization thanks to its customizable configurations. Choose from 3 drawer heights and compose freely the interior layout to suit your needs.

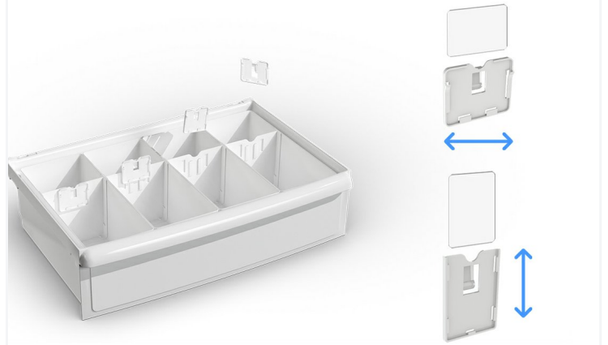

Separation bins

Medical furniture adapts to every care organization thanks to its customizable configurations. Choose from 3 drawer heights and freely compose the interior layout to suit your needs with the separator bins. A flexible and evolutive design that allows you to optimize space, improve ergonomics and make every care station more functional on a daily basis.

Separators

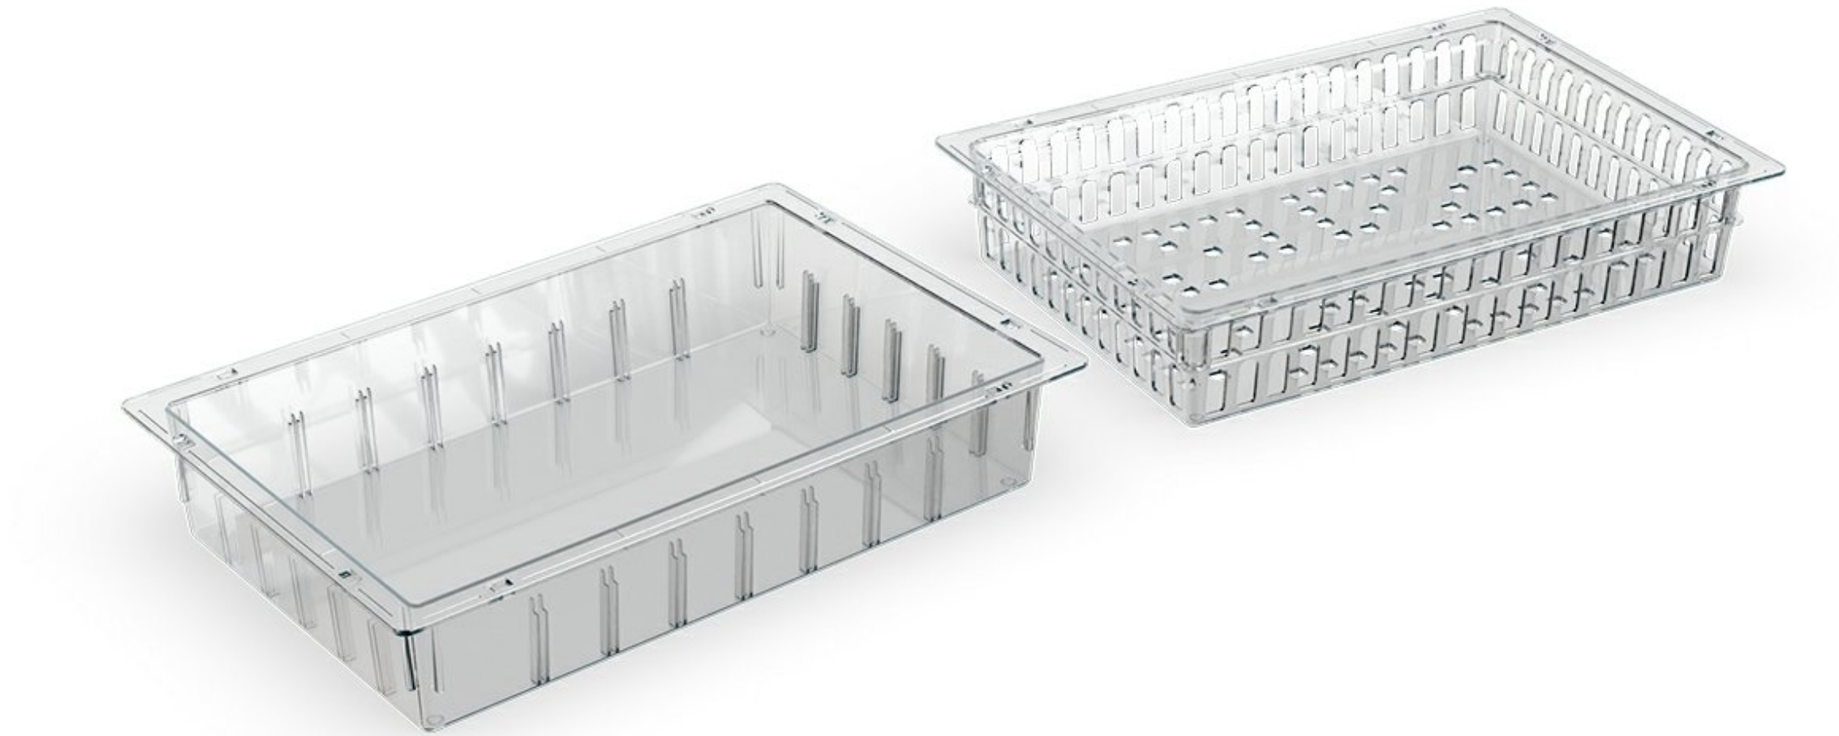

Freely compose the interior layout to suit your needs with divider bins and separators, separator combs, subdivision boxes that isolate each care element for greater safety. A flexible and evolutive design that allows optimizing space, improving ergonomics and making each care station more functional on a daily basis.

Label holders and labels

Label holders on medical furniture drawers facilitate rapid and acurate identification of contents, reducing errors and optimizing care organization. They enable clear identification of drugs, medical devices or supplies, improving productivity and workflow for teams. Adaptable and modular, they contribute to a structured and secure care environment, while simplifying the day-to-day management of materials and reinforcing the efficiency and safety of interventions.

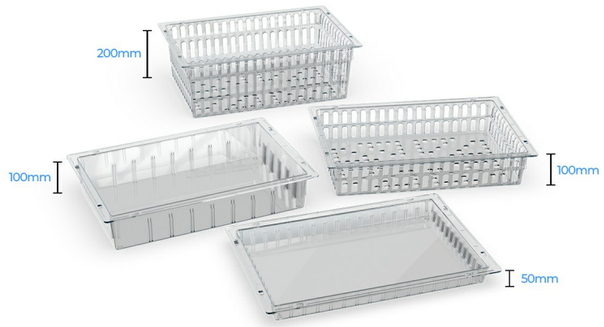

COMPOSANTS : Bac à lèvres

The lip tray, a universal and standardized storage method, features a rear groove for suspension, and thus creates an isolated zone limiting liquid contamination. Transparent for quick spotting of contents, it can be openworked for added lightness. It adapts to all structures and is easily cleaned, offering a practical, hygienic and functional solution for healthcare organization and safety. Available in 3 heights to optimize storage.

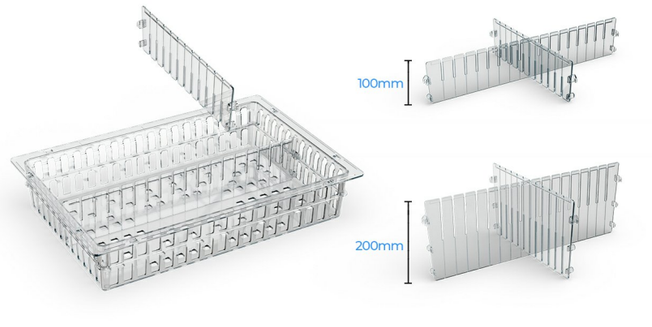

CHARACTERISTICS

COMPOSANTS : Bac à lèvres

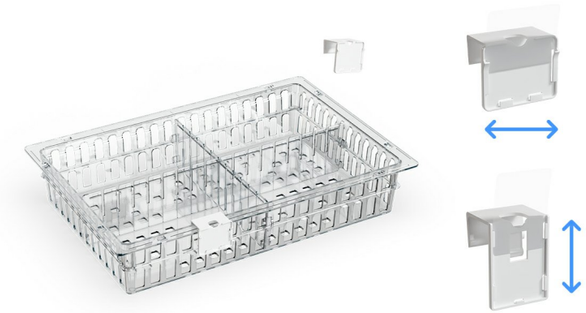

Choosing a lip tray

The full or perforated, transparent lip trays offer a secure and hygienic storage solution for medical furniture. their closed design limits the risk of liquid contamination while allowing quick viewing of contents. Easy to clean, they ensure durability and practicality for everyday use. Adaptable to all structures, it optimizes the organization of instruments and consumables, while facilitating the work of care teams. Lightweight and robust, it combines safety, ergonomics and efficiency. Available in 3 heights to optimize storage.

Lips tray combs

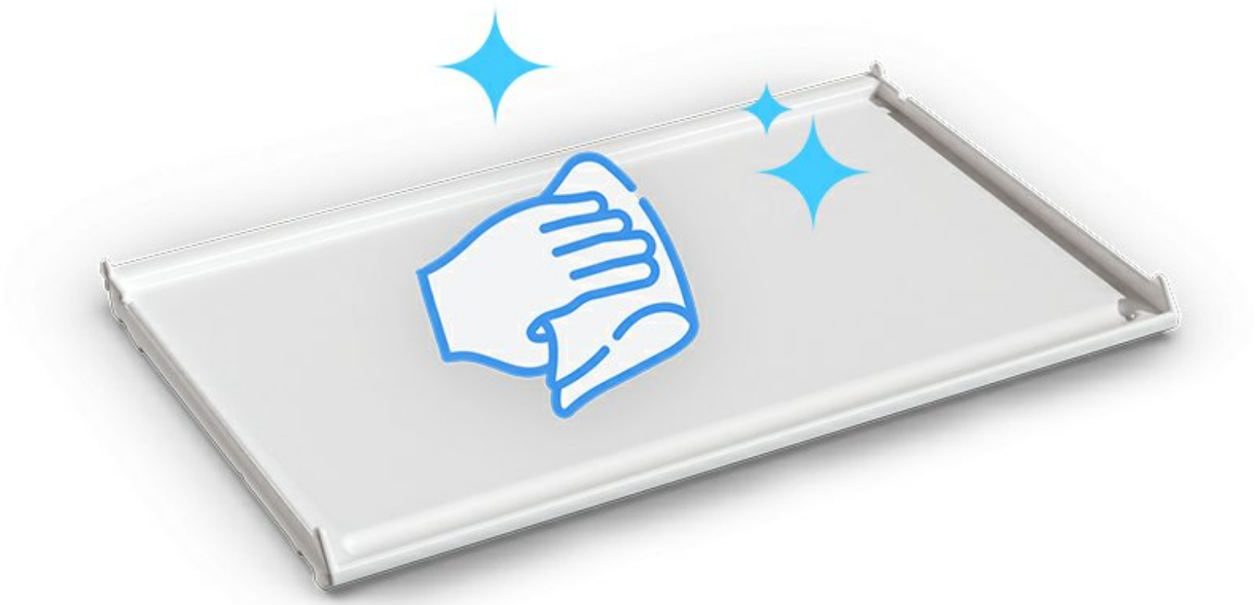

Freely compose the interior layout of the lip tray according to your needs thanks to separation combs that isolate each care element for greater safety. A flexible and scalable design that optimizes space.Many models to create your own organization.

Label holders and labels

Label holders on medical furniture drawers facilitate rapid and acurate identification of contents, reducing errors and optimizing care organization. They enable clear identification of drugs, medical devices or supplies, improving productivity and workflow for teams. Adaptable and modular, they contribute to a structured and secure care environment, while simplifying the day-to-day management of materials and reinforcing the efficiency and safety of interventions.

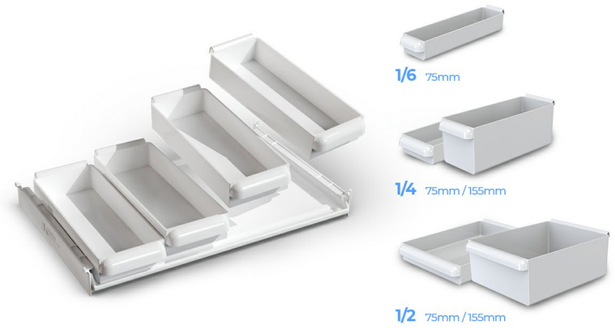

COMPOSANTS: Étagères

The modular shelf offers practical and accessible rangeement for medical furniture. Designed to optimize the organization of instruments and consumables, it facilitates the daily work of healthcare teams. Robust and stable, it supports a variety of equipment while remaining easy to clean, guaranteeing hygiene and durability. Adaptable to different configurations, it enables efficientstructuring of the care space, offering quick access to essential equipment and contributing to a fluid, safe and ergonomic working environment.

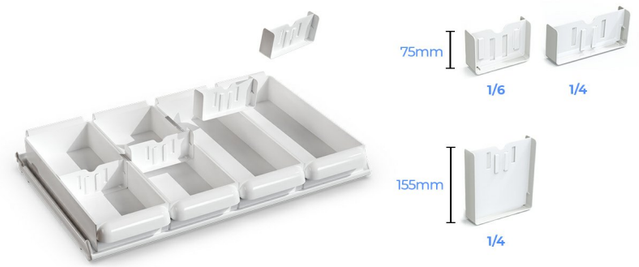

CHARACTERISTICS

COMPOSANTS: Étagères

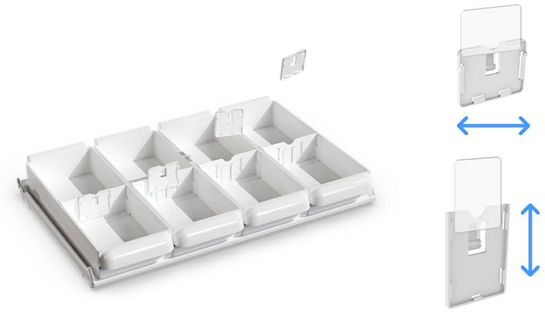

Separation bins

Medical furniture adapts to every care organization thanks to its customizable configurations. Choose from 3 drawer heights and freely compose the interior layout to suit your needs with the separator bins. A flexible and evolutive design that allows you to optimize space, improve ergonomics and make every care station more functional on a daily basis.

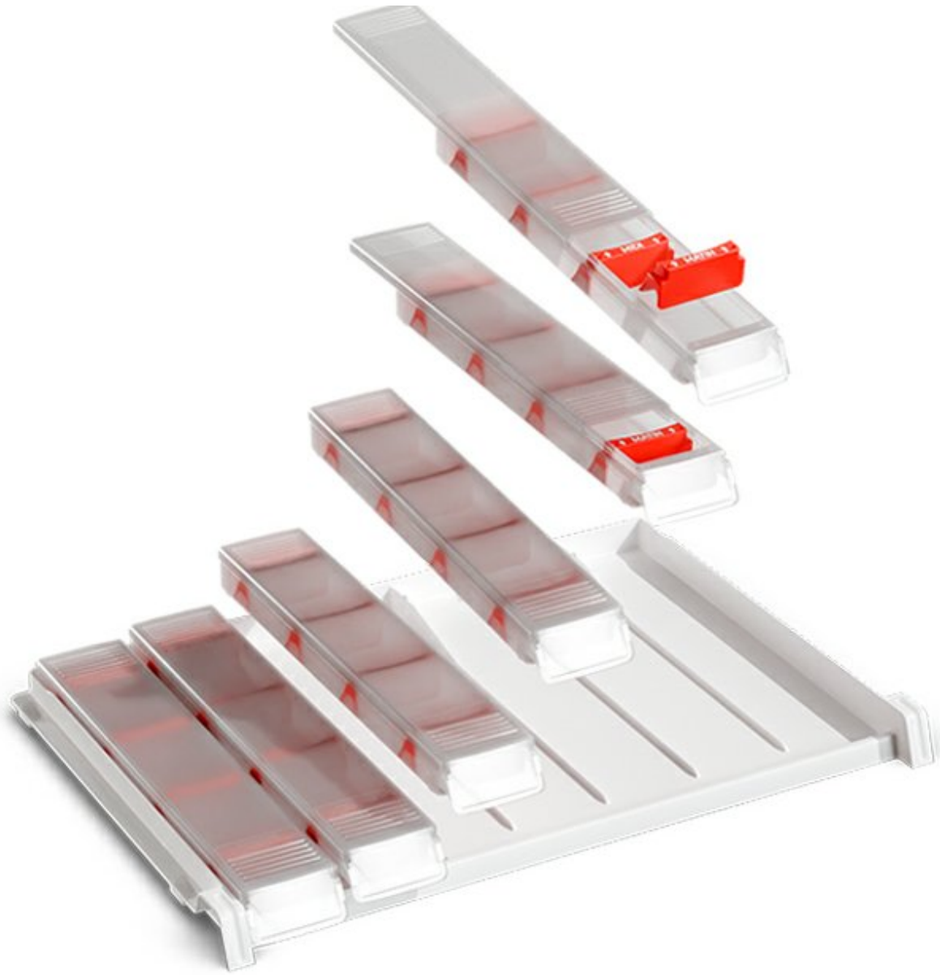

Separators

Freely compose the interior layout to suit your needs with divider bins and separators, separator combs, subdivision boxes that isolate each care element for greater safety. A flexible and evolutive design that allows optimizing space, improving ergonomics and making each care station more functional on a daily basis.

Label holders and labels

Label holders on medical furniture drawers facilitate rapid and acurate identification of contents, reducing errors and optimizing care organization. They enable clear identification of drugs, medical devices or supplies, improving productivity and workflow for teams. Adaptable and modular, they contribute to a structured and secure care environment, while simplifying the day-to-day management of materials and reinforcing the efficiency and safety of interventions.

The 7 pill dispenser trays BJMM or BJGM enable clear, organized nominative dispensing for each patient. Functional and modular, they can be complemented by one or more drawers intended for "if needed" treatment or forstoring small medical equipment (blood pressure meter, gloves, consumables...). A practical solution for optimizing the preparation and distribution of treatments on a daily basis.

Label holders and labels

Label holders on medical furniture drawers facilitate rapid and acurate identification of contents, reducing errors and optimizing care organization. They enable clear identification of drugs, medical devices or supplies, improving productivity and workflow for teams. Adaptable and modular, they contribute to a structured and secure care environment, while simplifying the day-to-day management of materials and reinforcing the efficiency and safety of interventions.

COMPONENTS: Cassette

The secure cassette offers a fixed and inviolable storage space, ideal for sensitive products. Its locking system, possible at any height, guarantees reinforced protection and controlled access in all circumstances. Designed to accommodate hazardous or toxic contents, it enhances the safety of staff and patients, while ensuring reliable organization in line with hospital requirements.

Internal runner walls / Slides	PA6 with glass fibers

BASE

Type of footing	6 swivel wheels with 2 braked at the front
Wheels diameter	125 mm

TYPE OF ATTACHMENT

Internal runner walls / Slides	Removable slide without tools

SAFETY CHARGE

Maximum admissible load	280 kg

COLORS

Box	Quartz

CAPACITY

Slides number (G height)	21G
Typ of springers	Sliders
Sliders: ABS tray height 50 mm	56
Sliders: Shelf for Daily pillboxes medium model height 50 mm	58

FIRE CLASSIFICATION

Plastic	M2
Vegetable fibers	D-s2d0

MASTER KEY FOR CASSETTE ALLIBERT MEDICAL

OP-PASSP03

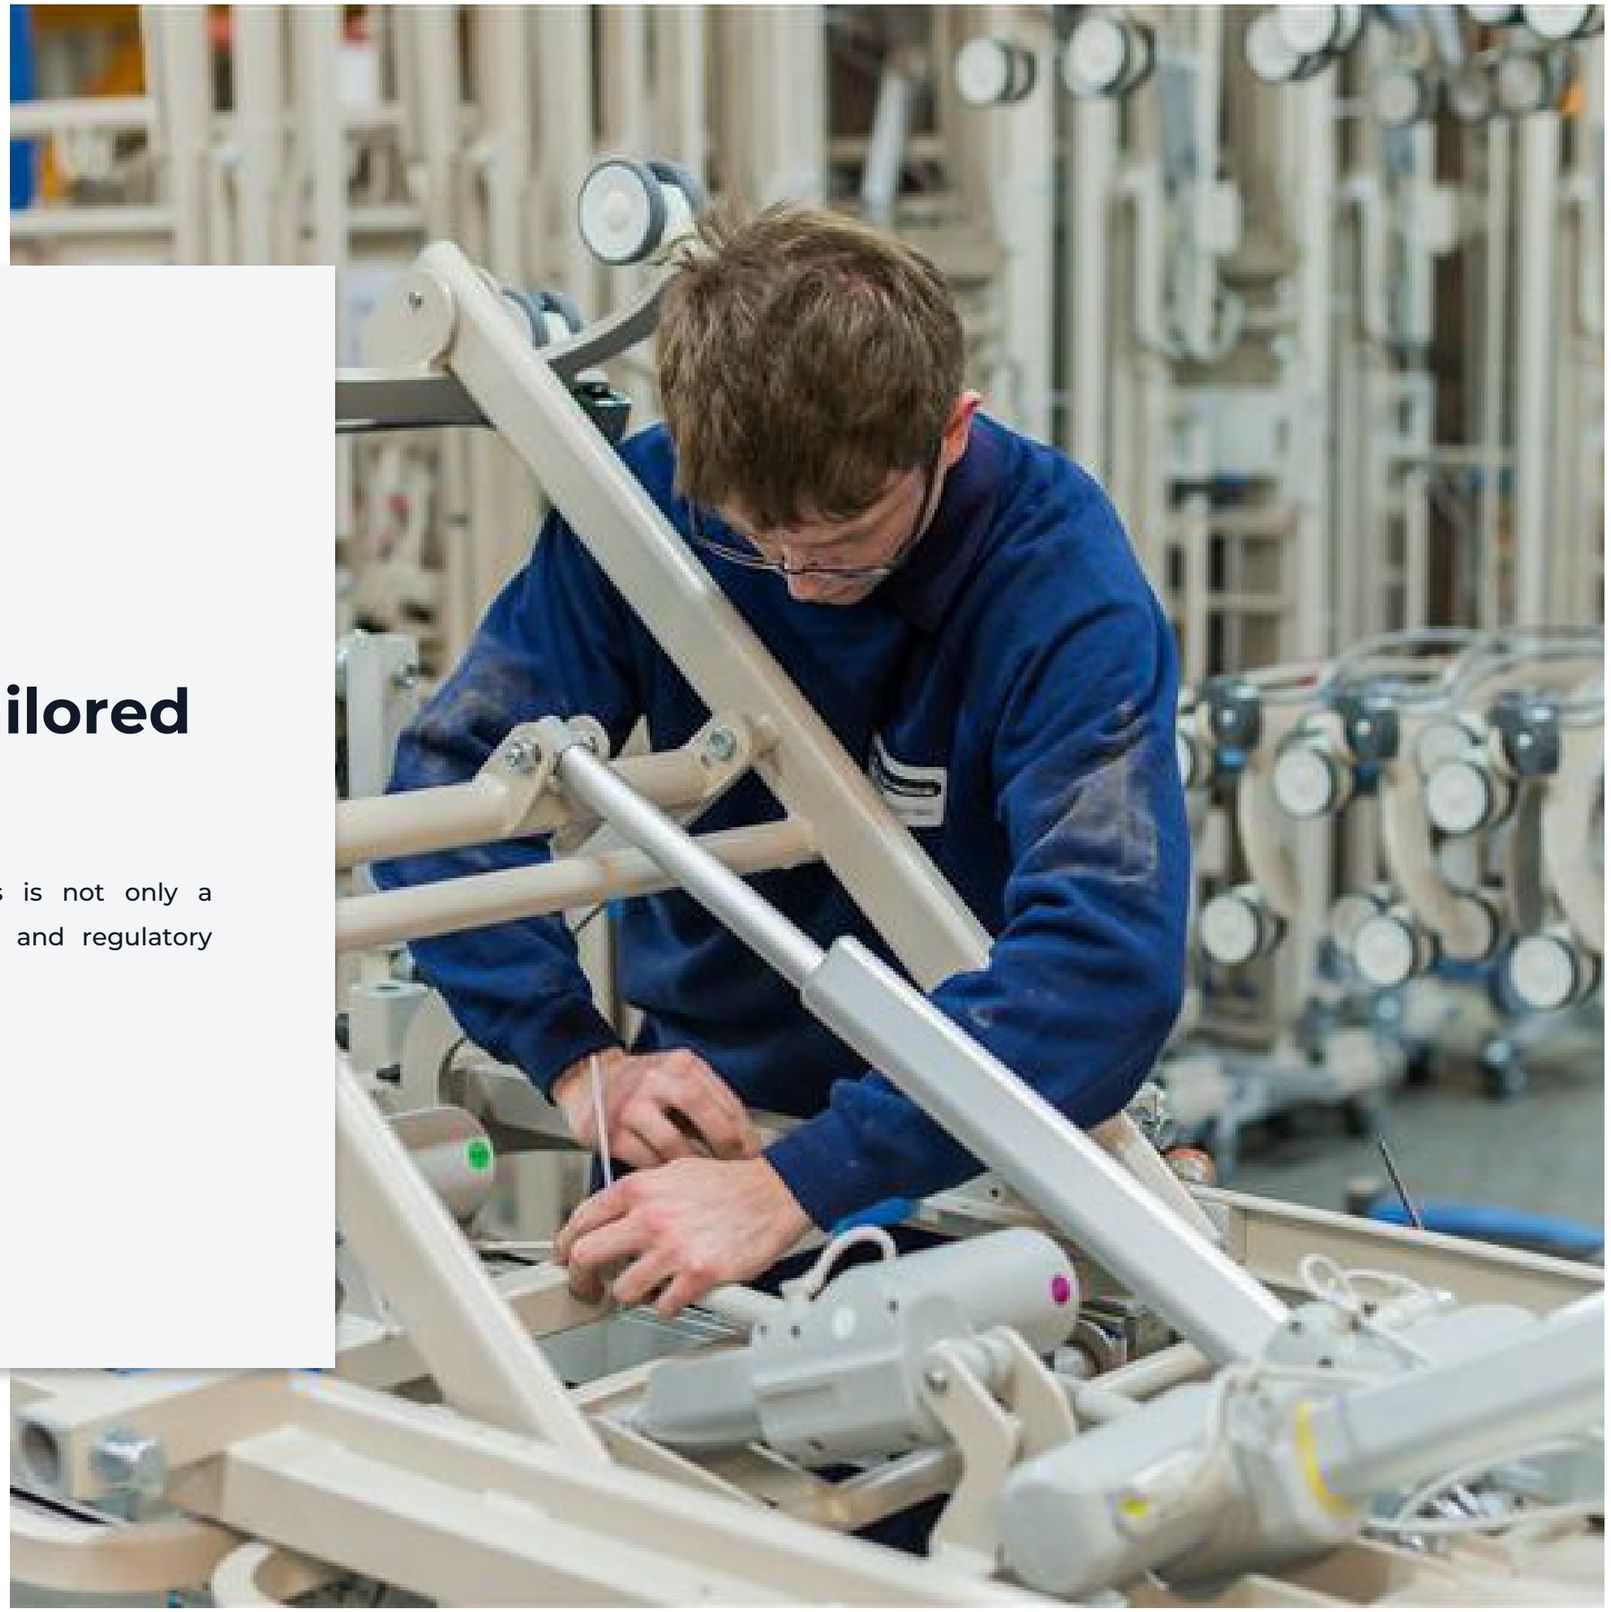

Preventive maintenance tailored to your needs

The maintenance of medical devices is not only a **technical obligation**, but also a **legal** and regulatory responsibility of the organisation.

It is based on:

- A clear policy
- Traceability procedures
- The use of compliant parts
- And staff training

The advantages of preventive maintenance

THE BENEFITS OF REGULAR MAINTENANCE OF YOUR EQUIPMENT

- Improved performance: maximum fleet availability.
- Improved quality: a reliable and continuous service.
- Lower costs: reduced repair costs.
- Fewer breakdowns: continuity guaranteed.

EXTEND THE LIFESPAN OF YOUR EQUIPMENT & ENSURE SAFETY

Our maintenance programmes are designed to:
- Ensure your equipment performs to its full potential.
- Provide regular checks and reliable diagnostics.
- Safeguard the safety of patients, residents and carers.
- Maintain your organisation’s regulatory compliance.

A BUDGET UNDER CONTROL

Our maintenance solutions help you to:
- Plan your expenditure.
- Avoid unexpected costs.
- Optimise your investments with complete transparency.

CERTIFIED COMPONENTS FOR SUSTAINABLE VIABILITY

All our services are carried out using original parts that have been tested and approved, guaranteeing:
- Maximum safety when using your equipment.
- Strict compliance with regulatory standards.
- The durability and reliability of your beds, mattresses and accessories.

Our preventive maintenance services

A SINGLE POINT OF CONTACT FOR A COMPREHENSIVE SOLUTION

From pre-sales to after-sales, we support you every step of the way.

Through a **detailed analysis** of your needs, we provide **tailored technical support**, based on a **long-term** and **effective** partnership.

EXPERTS AT YOUR SIDE

Our technicians and engineers, who receive regular training in the latest innovations, guarantee you:
- A responsive, high-quality service.
- Professional installation of your equipment.
- Comprehensive training for your teams, delivered directly on-site.

OUR TECHNICIANS CARRY OUT A FULL INSPECTION

- Mechanical inspection: assembly, joints, brakes, locking mechanisms.
- Electrical inspection: components, controls, sensors.
- Safety features: barriers, locking systems, protective devices.
- Lubrication: re-greasing of all pivot points.
- Electrical tests: carried out in accordance with current standards.

Each operation (inspection, adjustment, replacement) is recorded in the technician’s maintenance report.

RENOVATION OF THE PARK

Following the visit, our preventive maintenance team will email you the **maintenance report** completed for each piece of equipment.
The **service reports** are sent to your HAcare contact, who will draw up the necessary quotes for repairs or replacements.

This provides you with **comprehensive** and **transparent** tracking of the **maintenance** of your equipment fleet.

The result: a clear and traceable process that guarantees the safety, compliance and availability of your equipment. Translated with DeepL.com (free version)
